

## Summary of connecting sound devices

- Locate appropriate ports for the cables
  - Often color coded
    - \* Green is for speakers / headset
    - \* Pink is for microphone
  - May be more than one set!
- Identify correct port based on embossed icon
  - Embossed symbol differs but should be some representation of function
    - \* Example, headset symbol marks the green port (even if there is no color coding)
- Test connection with Sound Recorder that came with Windows
  - In Windows XP you will find this program in:  
Start > All Programs > Accessories > Entertainment > Sound Recorder
  - Sounds notated as waves in Sound Recorder window
- Troubleshooting ideas
  - Connection
  - Not muted
  - Enough volume
