

DID YOU KNOW...

- The AA degree is a good choice for future education, social science (history, psychology, sociology, etc.), liberal arts (languages, English, fine arts, etc.) majors, or for a professional school that requires a strong liberal arts background. In most cases, if a student wishes to attend a university, the Associate in Arts degree is the best degree to pursue.
- The AS degree is a good choice for future engineering, math, science (biology, chemistry, physics, etc.) or technical (computer science) majors.
- Associate in Applied Science (AAS) degree graduates who wish to attend a university can work with the University Transfer advisors to plan the transition. Though AAS degrees are not designed to fully transfer to universities, transfer advisors can help you plan the most efficient, cost-effective path to reach your dreams.

UNIVERSITY TRANSFER

Do you dream of a university degree?

The Associate in Arts (AA) and Associate in Science (AS) degrees at SCC are the only fully transferable degrees that can be your bridges to the university.

With an AA or AS degree, you can easily transition to NC universities and most private colleges to achieve your professional dreams.

You can earn freshman and sophomore-level general education credits towards your bachelor's degree.

The AA and AS degrees are economical, student-friendly alternatives to spending big money at the universities. For example, tuition at SCC is around \$2,288; at a NC public university it's estimated to be around \$6,423, and some private colleges can cost more than \$23,000/year.*
