Why is Behavior Assessment Necessary?

In the post-Virginia Tech shooting era, colleges and universities around the country are becoming more diligent and proactive in providing a safe environment for students, faculty, staff, and visitors to their campuses. Changes in the Family Educational Rights and Privacy Act (FERPA) have given administrators “appropriate flexibility and deference” with regard to the disclosure of educational records and information in emergency situations (Federal Register, 2008).

Stanly Community College understands the climate that exists on college campuses. Stanly Community College has established the Campus Assessment Response and Education Team (CARE) to serve as an additional measure for campus safety. That having been stated, it must be understood that even with the best intentions, situations may arise that are unforeseen by any member of the college community. CARE will operate in some instances with very limited information while exercising due diligence to protect the campus community and the individual.

CARE - Mission Statement

The Campus Assessment Response and Education Team is dedicated to a proactive, coordinated, and planned approach to the identification, prevention, assessment, management, and reduction of interpersonal and behavioral threats to the safety and well-being of Stanly Community College students, faculty, staff, and visitors.

CARE Goals

- Provide a safe physical environment for members of the campus community.
- Provide a safe emotional environment for the campus community.
- Promote peace of mind for friends and family of the campus community.

Campus Members Responsibilities

It is the responsibility of faculty, staff, and students to immediately report any situation that could possibly result in harm to anyone at the college. These reports may be directed to the Campus Assessment Response and Education Team or campus counselor. If there is an active or immediate risk of violence to **self or others**, Campus Police should be contacted at 704-991-0300.
