PHILOSOPHY OF THE ASSOCIATE DEGREE NURSING PROGRAM

Mission
The Associate Degree Nursing program supports the missions of both the North Carolina Community College System and Stanly Community College. The faculty is committed to providing accessible, high quality nursing education to meet the diverse and changing healthcare needs of the service areas and to promoting the development of qualified life-long learners prepared for the professional role of registered nurse at the entry level. The philosophy of the Associate Degree Nursing Program is derived from statements about health, quality of life, achievement of potential, the individual, environment, health, nursing, the practice, and education of the Associate Degree Nurse. Within this mission, the goal of nursing faculty is to foster quality and caring nurses for the individual, families and significant persons, and the community. The aim is to facilitate optimum health, quality of life and achievement of potential for the individual.

Vision
Stanly Community College’s ADN Faculty envision program graduates providing safe, competent nursing care within the Registered Nurse scope of practice after successfully meeting the educational requirements to take and pass the National Council Licensure Examination (NCLEX-RN).

The Associate Degree Nurse
The practice of nursing is directed toward meeting the healthcare needs of individuals throughout their lifespan. The graduate of the Associate Degree Nursing program at Stanly Community College is prepared to meet the educational competencies defined by the National League for Nursing and the Nursing Practice Act of North Carolina. The model of competencies derived by the National League for Nursing is noted below for all levels of education, including the Associate Degree Nurse:

**Associate Degree Nursing Education**

Nursing education at the associate degree level, in the North Carolina Community College System, is a process that facilitates changes in behavior, the acquisition of knowledge, skills, and attitudes necessary to function in the role of the entry-level nurse. The curriculum is conceptually based and founded on principles of culturally competent adult and collaborative learning. It incorporates evidence-based nursing theory and practice, general education, and the sciences in an environment conducive to learning.

The Associate Degree nursing program at Stanly Community College provides an education that is flexible, progressive, and sensitive to the changing needs of the individual, significant support person(s), and community. Through these educational experiences, students will have opportunities to develop critical thinking and problem solving skills which can be applied in real-world application. SCC’s ADN program integrates three nursing roles into the educational experiences, including: provider of care; manager of care; and member within the discipline.

The responsibility of the faculty of Stanly Community College Associate Degree Nursing Program is to facilitate the student’s understanding and ability to meet the competencies for nursing practice through the design and evaluation of learning experiences. The nursing student is responsible for actively participating in learning experiences and developing the knowledge, skills, and attitudes necessary to provide quality individual centered nursing care. It is the belief of the nursing faculty that education is an interactive exchange between instructor and student.

**Conceptual Framework**

The conceptual model provides a mental scaffold or framework. The primary framework contains content related to the individual, the healthcare system, and nursing. The domains of the individual, the healthcare system, and nursing provide the conceptual framework guiding the associate degree nursing curriculum. Concepts are organized within each of these domains, and learning occurs from simple to complex. Supporting structures to the curriculum are related to client care and include quality of life, achievement of potential, and health.

The student is at the center of the conceptual model. The environment, which is noted as all-encompassing to the model, effects all structures of the model. Additional fundamental parts of the curriculum which are integrated throughout the program are the nursing process, communication and documentation, teaching/learning, caring, evidence-base practice and cultural diversity.
Primary framework definitions and supporting structure definitions are found below:

**Individual**

The faculty of Stanly Community College believe that each individual is a complex, multidimensional, unique, and significant being possessing inherent value and worth, and a member of a family, community, and culturally diverse society. All individuals have dynamic bio-physical, psychological, socio-cultural, spiritual, and developmental needs that contribute to health, quality of life, and achievement of potential.

Adaptation to the environment requires the individual to change throughout the lifespan. Each individual has a right to healthcare and to information that will assist him or her to participate actively in his or her healthcare in order to achieve the highest level of wellness possible. All individuals should be cared for, respected, nurtured, understood, and assisted. In order to provide care, act as a member within the discipline, and manage care, nurses must view the individual at the center of any nursing activity.

**Healthcare System**

The healthcare system encompasses a myriad of entities. These entities provide specific services related to the care of the individual. Services are aimed at promoting health, assuring quality of life, and achieving one’s potential.

**Nursing**

Nursing is not only a discipline of science, but a life-long learning process. The process integrates knowledge and skills derived from biological, sociological, and behavioral sciences and information technology to deliver client-centered, culturally competent, holistic care. Through caring, empathy, ethics, and the development of a therapeutic relationship with the individual and significant support person(s), the nurse integrates the art of nursing with the scientific foundation for nursing practice utilizing the nursing process.

By incorporating documented best practice, the nurse functions autonomously as manager of care and provider of care, and functions collaboratively as a member with the interdisciplinary team to promote health, quality of life, and achievement of potential.
Environment
The individual, as well as the student within this model, is in constant interaction with a changing environment that consists of both internal and external forces that varies throughout the lifespan and has the potential to cause stress in the individual/student. The goal for the individual/student is to utilize innate and learning coping mechanisms to adapt to these stressors.

Health
Health is a dynamic, ever-changing state of mental, physical, and spiritual well-being, which exists on a continuum from optimal wellness to illness and ending in death. The individual’s needs for healthcare are determined by his/her position on the continuum. Each individual’s health is based on his/her cultural perceptions and beliefs of health and illness and the ability to adapt to internal and external environmental forces. The individual is responsible for and capable of identifying, learning, and practicing health behaviors that can promote wellness, prevent illness, restore or maintain wellness, or achieve a dignified death.

Quality of Life
Quality of life, as it pertains to healthcare, is multifaceted and multidimensional. Standard indicators of the quality of life include not only wealth and employment, but also one’s environment, both physical and mental, education, recreation and leisure time, and social belonging.

Achievement of Potential
Achievement of potential is the individual’s growth toward attaining one’s utmost ability and quality of life. It is based on the individual’s choices, perceptions, personal goals, life experiences, and holistic health. Cultural preferences are considered as they relate to one’s personal beliefs of achievement.

Resources reviewed prior to development/revision of the program philosophy:

http://www.nln.org/professional-development-programs/competencies-for-nursing-education/nlncompetencies-for-graduates-of-nursing-programs
SCC’s Associate Degree Nursing Program is one of 58 associate degree programs in North Carolina, and one of 55 based at a community college. SCC began by offering the LPN curriculum in 1973 and in 1974 graduated its first class of Licensed Practical Nurses (LPNs). SCC graduated a total of 119 LPNs before adding its two-year associate degree nursing program in 1985. The first graduates of the new two-year Associate Degree Nursing program were awarded credentials in 1986. In 1999, Stanly Community College began operating a satellite ADN program on the Old Charlotte Highway campus of South Piedmont Community College. This arrangement continued until 2006 when Stanly Community College and South Piedmont Community College decided to dissolve the relationship. In 2005, the college’s ADN program was named after Mrs. Annie Ruth Kelley as recognition of her part in the growth and success of the program. Currently, the nursing program of Stanly Community College is housed at the Crutchfield Education Center in Locust, NC. Prior to the move to Crutchfield in fall of 2013, the nursing program utilized two campuses, that of the main campus in Albemarle and that of the Locust site at the Crutchfield Education Center roughly fifteen miles apart.

The SCC ADN program is provided in a hybrid composition. The nursing courses (NUR courses) are delivered using the Interactive Video Room (IVR), which is a video conferencing system where an instructor is able to communicate to those students in seated class using CF 134/135 and communicate simultaneously with online students viewing the classroom discussion in real time if chosen. This communication is then recorded and flipped into video files for students to watch in an asynchronous fashion. Additional communication takes place between all students regarding questions related to course content via asynchronous discussion forums through the Moodle portal.

In 2010, Stanly Community College’s nursing faculty began the North Carolina Curriculum Improvement Project (NCCIP). Since the creation of a conceptual based learning approach to nursing, our curriculum has undergone complete overhaul and is continually evaluated for areas of improvement. Spring of 2012 introduced the first graduating class to take the NCLEX-RN based on conceptual learning implemented in 2010.

No matter the physical space used for learning to take place, whether it is in person or virtual, the Annie Ruth Kelley Associate Degree Nursing Program is one that thrives on innovation. In addition to the delivery of course content mentioned above, which by the way is specific to SCC, we utilize our Simulation Hospital as a learning experience for students with faculty. Simulated clinical learning is a nonthreatening environment for students to practice critical thinking without the risk of patient harm. Efforts have been put forth to enhance real-life clinical experiences by incorporating interprofessional simulation scenarios. Spring 2015, fall 2015 and fall 2016 began the initial introductions of simulated nursing care with other disciplines (Respiratory Therapy, Radiology, Pharmacy Technicians, EMS, and Medical Office Assistants). Our hope and future plan is to continue creating more interprofessional care experiences within the Simulation Hospital and perhaps in clinical partnerships.

The commitment of our program is evident as faculty members hold pre-semester meetings to plan, mid-semester meetings to evaluate student progress, and post-semester meetings to evaluate outcomes. 2014 marked the first curriculum review and has since been an annual event of faculty to identify strengths and weaknesses for program improvements. Our program endpoint involves each student behaving as a safe, culturally competent, entry-level nurse after passing the NCLEX-RN. This idea is not only supported by our governing body which gives us approval status, but is agreed upon by all faculty employed within the nursing program. Therefore, each program student learning outcome was meticulously developed, as well as each course specific student learning outcome developed to show progression toward this culmination. Review of data, such as tests, test questions, clinical experiences, rubrics and other anecdotal documents

Revised: 5/08; 7/09; 2/10; 7/10; 8/11; 1/12; 8/12; 6/13; 8/14; 9/14; 1/15; 8/15; 10/15; 5/16; 8/16; 1/17; 4/17; 8/17
used throughout the curriculum provide data to convey if the course specific student learning outcomes are met. This data further allows faculty to determine if specific areas need to be altered or if the specified criteria is actually supporting the intended outcomes.

The spring curriculum review meeting of 2016 involved a group effort of identifying anchors for our program. Anchors are ideas that are in courses and cover the span of the ADN curriculum. Anchors agreed upon by all faculty included the idea of assessment, communication, (critical) thinking, and safety. This identification of curriculum anchors fostered the development of the acronym ACT Safe. Nursing faculty plan to use this acronym to facilitate nursing education.

The changes of the program over the years, substantial or minute, continue to support the mission of the college to provide a learning-centered environment that encourages student access and completion, fosters partnerships, enables life-long learning, and enhances the economic, social and cultural life of the community. Moreover, the mission of the nursing program is apparent; it provides accessible high quality nursing education to meet the diverse and changing health-care needs of the service area and promotes the development of qualified students prepared for the professional role of registered nurse at the entry level.

Accreditation and Approval Status

The Annie Ruth Kelley ADN Program is part of SCC, which is SACS (Southern Association of Colleges and Schools) accredited. The ADN Program is currently in pre-candidacy status with the Commission of Nursing Education Accreditation (CNEA), which was granted summer 2017. The program has full approval granted by the North Carolina Board of Nursing.

Annual Review of Philosophy, Conceptual Framework, and Outcomes

The Annie Ruth Kelley Associate Degree Nursing Program faculty at SCC accepts the responsibility to annually review and revise as necessary the statement of philosophy, outcomes, and organizing framework. This review by faculty addresses the current needs of both healthcare providers and consumers ensuring that a close congruency with the college mission, goals, and value statements are maintained. These reviews are accomplished by discussion in faculty meetings, and reflected in meeting minutes which are available for review by evaluators of the program.

General Purpose of the ADN Student Handbook

The purpose of this handbook is to provide the Associate Degree Nursing Student with relevant information regarding Stanly Community College’s Associate Degree Nursing Program, also known as the Annie Ruth Kelley Associate Degree Nursing Program. Policies and procedures specific to the ADN program are found within this handbook. These policies and procedures have been developed by the nursing faculty and are updated periodically. Students have access to the Handbook via all NUR Moodle courses.

Accountability

The student shall read the ADN Student Handbook, the course syllabi, and other official college publications. Students will not be excused from any regulation, requirement or deadline set forth in these publications.

Revised: 5/08; 7/09; 2/10; 7/10; 8/11; 1/12; 8/12; 6/13; 8/14; 9/14; 1/15; 8/15; 10/15; 5/16; 8/16; 1/17; 4/17; 8/17
PROGRAM OUTCOMES

Upon completion of the Associate Degree Nursing Program, the graduate will upon licensure:

1. Establish safe, professional nursing behaviors including accountability for continued nursing competence as demonstrated by passing the NCLEX-RN and licensure as delineated by the rules and regulations of the North Carolina Board of Nursing.

2. Communicate with individuals, significant support person(s), and members of the interdisciplinary healthcare team as demonstrated by a passing evaluation on the summative clinical evaluation tool described under the nursing domain.

3. Formulate holistic assessments to identify the needs of the individual in order to provide culturally competent client-centered care as demonstrated by satisfactory comprehensive assessment of a mock client.

4. Evaluate healthcare informatics to defend evidence base practice, clinical judgments, and management decisions as demonstrated by the operative use of informatics as evidenced by the evidence-based practice project in the NUR capstone course meeting all rubric requirements.

5. Create nursing plans of care for clients across the life-span as demonstrated in graded clinical performance to prove cognitive proficiency for nursing care of patients.

6. Incorporate teaching and learning principles into nursing practice as demonstrated by teaching projects with a passing score of 80% or above.

7. Manage healthcare for clients by utilizing cost-effective nursing strategies, quality improvement processes, and legal/ethical awareness to promote quality outcomes as demonstrated by graded clinical performance to prove cognitive and behavioral proficiency of the healthcare domain as described on the clinical summary.
Course specific student learning outcomes are found within course syllabi.

Health

The Environment

Stanly Community College Conceptual Model
Anchors are ideas that are in courses and cover the span of the ADN curriculum. Anchors agreed upon by nursing faculty included the idea of assessment, communication, (critical) thinking, and safety. This identification of curriculum anchors fostered the development of the acronym ACT Safe. Use of this acronym facilitates nursing education by properly assessing clients and families, communicating with clients and other members of the healthcare team, critically analyzing information obtained through the assessment to properly implement nursing interventions and evaluate their effectiveness, all the while maintaining a safe environment for the client.

STUDENT POLICIES

1. Appearance
   A. General
      1. It is expected that each student be neatly groomed to promote a professional appearance.
   B. Clinical Sites
      1. The ADN student uniform includes a turquoise top with embroidered emblem and black pants or black knee-length skirt. Black shirts without adornment may be worn under uniform top. Clean, closed, non-porous leather, black shoes, and plain black socks with pants or black hose/tights with knee-length skirt.
      2. Anything worn outside of the above described uniform is considered a breach of student policy and the student shall be sent home.
      3. You will need a watch with a second hand, bandage scissors, stethoscope, ECG calipers and penlight. Note: ECG calipers and penlight are part of the nursing bag purchased through the uniform vendor.
      4. A clinical notebook will need to be created to keep throughout the entire program to show clinical progression. Any ring-binder will work and will be purchased by the student at any retailer of his/her choice.
      The following promote the professional appearance of nursing, promote student and client safety, and promote good hygiene practices expected of the student:
      5. Hair should be neat, clean, of a natural color, and off the collar.
      6. No tattoo(s) showing.
      7. Clean, fresh and wrinkle free uniform daily.
      8. Students should not wear perfume or cologne to avoid exacerbating symptoms of nausea and vomiting by clients.
      9. Jewelry: Only wedding and engagement rings should be worn. One pair of small posts in the lower ear lobe is allowed for those with pierced ears. No body piercings should be showing in any body part other than ear lobes, including clear posts to maintain patency of piercings.
      10. Nails: trimmed short (not beyond the fingertips) and clean, without nail polish. No artificial nails or gel nails are allowed.
      11. Identification: your school issued photo ID must be worn at all times.
      12. There will be times when you may want to wear a lab/warm up coat. Lab/warm up coats should be black, clean, wrinkle free fabrics, not of a sweatshirt material. The lab/warm up coat must have the SCC ADN embroidered emblem.
      13. No cell phones are allowed in the clinical areas.
      14. No chewing gum in the clinical areas.

Some clinical agencies may have additional requirements in regards to dress, appearance, etc. which shall be upheld by the visiting students. Students must abide by all clinical and facility specific policies.

Anyone not complying with these policies related to appearance will be sent home. This will be considered a clinical absence (see Clinical Attendance policy).
2. Conduct

Conduct viewed as disruptive will not be tolerated within class or clinical – See Student Code of Conduct Policy located in the policy section of www.stanly.edu.

A. Classroom:

1. SCC is “tobacco free”, therefore, no tobacco is allowed on campus.
2. Drinks in the classroom must have a screw-top lid.
3. No food or drink is allowed into the nursing lab at any time.

B. Clinical:

1. Knock before entering closed doors in the hospital. Wait for permission to enter before entering.
2. Smoking will not be allowed in the hospital or clinical area.
3. Breaks and lunch will be arranged by the clinical instructor.
4. Information regarding clients and fellow students is strictly confidential and can only be discussed in a private area for the purpose of learning. Any break of this rule of confidentiality will result in remediation and possible dismissal from the program and possible prosecution (See HIPAA regulations). The student is required to sign a confidentiality form stating that he/she understands and will abide by the policy.
5. Obscene or profane language will not be tolerated.
6. Students must remain within the clinical facility during meals and breaks.
7. Students must notify the instructor and primary nurse before leaving the floor.
   Failure to comply may result in an unsafe incident related to abandonment of client.

3. Performance

A. Performance Standards for Students in the clinical and classroom settings:

1. Critical Thinking:

Nursing students shall possess critical thinking abilities sufficient for clinical judgment.
Example: Students must be able to identify cause-effect relationships in clinical situations; develop or participate in development of nursing care plans.

2. Ethical Behavior and Cultural Competence:

Nursing students will provide services with respect for human dignity and the uniqueness of the client unrestricted by consideration of social or economic status, personal attributes, or the nature of health problems. Example: Students will care for clients assigned regardless of race, religion, or diagnosis.
3. **Legal Behavior:**
Nursing students will provide care within the scope of practice as stated in the NC Nursing Practice Act. Example: Students in the nursing program will learn to assess the patient’s physical and mental health and report and document according to those findings.

4. **Interpersonal Skills:**
Nursing students shall possess interpersonal abilities sufficient to interact with individuals, families, groups, etc. from a variety of psychosocial cultural backgrounds. Example: Students shall establish rapport with clients and health care team members.

5. **Communication Skills:**
Nursing students shall possess communication abilities sufficient for verbal and nonverbal interaction with others. Example: Students shall be able to explain treatment procedures to clients/family, document client responses, and report to others responsible in client care.

6. **Mobility:**
Nursing students shall possess physical abilities sufficient to move from room to room and maneuver in small spaces, stand and walk for extensive periods of time. Example: Students will be able to move around in client’s room and administer CPR.

7. **Motor Skills:**
Nursing students shall possess gross and fine motor skills sufficient to provide safe and effective nursing care. Example: Students shall be able to calibrate equipment, position clients, administer injections, insert catheters, etc.

8. **Hearing Skills:**
Nursing students shall possess auditory ability sufficient to monitor health needs and collect data. Example: Students shall be able to hear alarms, listen to heart and breath sounds, and hear a cry for help.

9. **Visual Skills:**
Nursing students shall possess visual ability sufficient for observation and data collection. Example: Students shall be able to observe color of skin and read scale on a syringe.

10. **Tactile Skills:**
Nursing students shall possess tactile ability sufficient for data collection. Example: Students shall be able to detect pulsation and feel skin temperature.

11. **Weight-Bearing:**
Nursing students shall possess the ability to lift and manipulate/move at least 40-50 pounds. Example: Students shall be able to move equipment and position patients.
B. Emotional Health

The emotional health of each student is evaluated by a primary care provider using the required medical form completed prior to starting the program. When emotional conditions prevent satisfactory classroom or safe clinical performance, the instructor will dismiss the student from class or clinical. The Director of Nursing, in collaboration with the Associate VP of the School of Health Sciences & Public Services and the Executive Vice President, can immediately dismiss the student from the ADN program. (Reference SCC Catalog – Student Code of Conduct)

C. Drug/Alcohol Policy

Any student whose behavior or appearance provides reasonable suspicion that the student is under the influence of alcohol or controlled substances may be required to submit to drug screening by a nursing faculty member in consultation with the Program Director of Nursing and/or Associate Vice President of the School of Health Sciences & Public Services. Facilities that provide clinical experience reserve the right to require testing in compliance with drug and alcohol policies of the institution. Failure to comply will result in dismissal from the program. Drug testing shall be at the students’ expense.

D. Immunizations/Background Checks/Drug Screening

Clinical agencies require students to submit immunization status, a criminal background check, and drug screening prior to being granted clinical privileges. Applicants accepted for admission to the ADN program at Stanly Community College are required to complete these screenings after notification of acceptance and prior to participation in on-site clinical training. Based on the results of the background checks, drug screening, and/or incomplete immunization records, clinical affiliates may deny access to their facility, resulting in the student’s inability to complete the clinical portion of his/her training. **Students unable to complete the clinical portion of his or her training will be unable to progress in the program.** Students are responsible for paying all costs associated with these requirements.

E. General performance related to clinical settings and classroom/lab settings:

1. Instructors will not be responsible for missed classes or lost materials by students. It is the student’s responsibility to seek additional help as needed.
2. Students are expected to complete clinical assignments within the allotted time.
3. Students are expected to immediately notify the instructor and/or team leader changes in client’s condition requiring immediate intervention.
4. Evaluations regarding student clinical performance will be documented with each clinical experience using a weekly clinical summary. Both student and instructor will have an opportunity to record comments and to communicate to each other both effective and ineffective behaviors on the weekly clinical summary. Based on the documentation within this record, a final grade of pass or fail will be assigned on the end of semester clinical summary. Both student and instructor are to evaluate the student’s clinical performance, identify strengths and weaknesses and make remediation plans as necessary. See Clinical Evaluation policy.

5. Students will be held accountable for retaining and refining skills and knowledge obtained in previous courses as they proceed through the program. Failure to do so will result in remediation, and possible dismissal from the program if remediation is not satisfactory.

6. Students should not represent themselves as nursing students from SCC while they are functioning in roles outside of school and clinical assignments (i.e., visitors, employees).

7. All medications are to be reviewed by an instructor prior to administration.

NOTE: Any medications requiring signed consents prior to giving, the RN will get the consent signed and then the student can give the medication.
(ex. ovarian hormones, Antabuse, oral antineoplastics).

** Drugs that are NOT given by nursing students: **

a. IV antineoplastics (Chemotherapeutics)
b. Whole blood and blood products, including packed cells, plasma, platelets, and Rhogam
c. Radioactive substances
d. Medications during CPR
e. Thrombolytics (i.e. TPA)

4. Progression and Dismissal Policies:

A. For the student to progress in the nursing program, a grade of C or higher must be achieved for all courses listed within the nursing program of study. All course work taken at SCC must have a 2.0 GPA or higher.

Students earning less than a C in a nursing course and/or any other course within the nursing program of study will be withdrawn from the nursing program automatically. If a student receives below a C (below 80) in the theory component or fails in the clinical component of nursing
courses a grade of F will be submitted for the overall grade for the course. Please be aware that
Satisfactory and Unsatisfactory assignments of each NUR course are linked to the end-of-
semester clinical summary, which is different from an unsatisfactory issued on the weekly clinical
summary. An unsatisfactory evaluation on the end-of-semester clinical summary will result in a
failing grade for the course.

Students taking general education courses from another college will be required to
present proof of course completion to progress. Students will not be allowed to preregister or
register without the transcript information. Progression depends on maintaining general education
course grades and GPA.
The grading scale for all NUR courses is as follows:

\[
\begin{align*}
A &= 94 - 100 \\
B &= 87 - 93 \\
C &= 80 - 86 \\
F &= \text{a score of less than 80 in theory or fails the clinical evaluation}
\end{align*}
\]

B. Students are assigned advisors for counseling related to the nursing curriculum. Advisors will
evaluate student progress within the courses. If problems arise at any other time during the
course, the student is responsible for scheduling an appointment with a nursing advisor.

C. In the event that a student’s physical or mental health interferes with the student’s academic
and/or clinical performance, the nursing faculty may require the student to submit written
verification of current health from an appropriate health care provider (i.e. physician, nurse
practitioner, psychiatrist, or psychologist). Upon review of the professional statement of health
submitted by the student, the Program Director of Nursing, the Associate Vice President of the
School of Health Sciences & Public Services and the Dean of Student Outreach & Support will
determine if the student may continue in the program. The Dean of Student Outreach & Support
will notify the student in writing of the decision.

D. In the event that a student’s behavior is not consistent with sound nursing practices and/or safety
essential to nursing, the faculty, clinical facilitators, or the Program Director of Nursing have the
authority to temporarily remove the student from the clinical, class, or lab setting immediately
with the loss of clinical hours if related to clinical removal. If the faculty or the Program Director
determines that the student has demonstrated behavior that conflicts with sound medical care
practices or safety, they may recommend to the Associate Vice President of Health Sciences &
Public Services and the Dean of Student Outreach & Support that the student be withdrawn from
the class or the program. The Dean of Student Outreach & Support will notify the student in
writing of this recommendation and will meet with the student, the faculty, the Program Director,
and the Associate VP to discuss the issue. The Dean of Student Outreach & Support will then reach a decision and inform the student in writing of that decision.

E. Students unable to complete the clinical portion of his or her training will be unable to progress in the program.

5. Infectious Disease Policy:
Because of the nature of the health care profession, students participating in required clinical education experiences will find themselves at risk for exposure to infectious diseases. The risk cannot be completely eliminated. However, it can be minimized by careful and consistent technique and the implementation of standard precautions in the care of all health care consumers. Students will be instructed in standard precautions. “Standard precautions” (i.e., gloves and safety glasses, gowns, handwashing and masks where appropriate) will be implemented in the care of all clients. Because of the nature of the student-client relationship, the client must also be protected from a student caregiver who may transmit infectious diseases.

The following information deals with the SCC nursing program policy for handling infectious disease:

I. Assignment of HIV positive clients to students:
A. Known HIV positive clients will not be assigned to first year nursing students during NUR 111, NUR 112 or NUR 212. Standard precautions shall be implemented for all clients.
B. Immunosuppressed students or students who have active infections will not be assigned as the caregiver for diagnosed AIDS clients.

II. Exposure to blood or other body fluids:
A. Exposure includes percutaneous injury with a contaminated sharp object (needle, lancet, broken slide, etc.) and exposure of mucous membranes or open skin lesions to blood or body fluid of clients.
B. It will be the student’s responsibility to advise his/her clinical instructor immediately when an incident has occurred. The clinical instructor will notify the clinical coordinator and follow the exposure policies of the clinical agency and the college. (see student occupational exposure incident report (appendix iiv)
C. Students will be responsible for health care expenses incurred in treatment following exposure to infectious diseases. It is advised that all students carry health insurance.
III. Immunizations and Certifications:

A. 2-step PPD testing is required yearly. Students must provide documentation of freedom from tuberculin infection on the physical form prior to entry into the program and clinical experience. It is the student’s responsibility to maintain verification of freedom from tuberculin infection on a yearly basis while enrolled in the ADN program. Failure to maintain this may jeopardize the student’s ability to participate in clinical activities.

B. Students are required to present verification of two MMR vaccines or a lab report indicating immunity.

C. The student must maintain a current Healthcare Provider CPR certification, which includes care of the adult, child, infant and AED.

D. Students are required to receive vaccinations for Hepatitis B at their own expense or sign a declaration of denial. Some clinical affiliates require vaccinations of students. (See Appendix v and vi)

E. Students, besides incoming LPN students, are required to have NAI certification and be listed on the NC Department of Health and Human Services Healthcare Personnel Registry prior to beginning nursing classes. Applicants must submit a certificate of satisfactory completion from a DHSR (Division of Health Service Regulation) approved Nurse Assistant, Level I program, and current unrestricted certification in Nurse Assistant, Level I as listed on the NC Nurse Aid registry (http://www.ncnar.org). If an applicant is currently employed as a Nurse Assistant level I but cannot produce a certificate from a DHSR (Division of Health Service Regulation) approved Nurse Assistant, Level I program, documentation from the applicants current employer that the applicant has spent at least 240 hours providing patient care at the bedside may be submitted for consideration.

Upon successful completion of NUR 112, students will be offered the option to obtain CNAII certification through the NC Board of Nursing. In order to acquire this certification, the student must hold an active CNAI certification and maintain it for CNAII certification.

F. Some clinical agencies are requiring flu vaccines of students. Although this is not listed on the immunization form at the beginning of the program (since it is not available then), this is often a request of some clinical agencies. If refused by the student, the clinical facility policy must be adhered to by the student.

G. A Tdap vaccine is required. It must be a Tdap, not a Td booster, within the last 10 years.

H. Varicella vaccines or lab reference indicating immunity is required.

I. Paperwork (medical form, immunizations/titers, clinical site required paperwork, CPR certification, background checks, urine drug screening and Handbook paperwork) are housed in electronic format that is username and password protected using the vendor Castlebranch.

Revised: 5/08; 7/09; 2/10; 7/10; 8/11; 1/12; 8/12; 6/13; 8/14; 9/14; 1/15; 8/15; 10/15; 5/16; 8/16; 1/17; 4/17; 8/17
Information is shared with clinical sites using this online format after student consent is obtained.

6. Testing:

A. The ADN program utilizes scantron answer sheets for testing purposes. When scantrons are in use, grades will be determined through that evaluation tool only. Hard copies or scrap paper will not be used for grading purposes.

B. Other computer based software applications are utilized within SCC nursing program (i.e. PrepU, Passpoint, VSim, Docucare). These are at the cost to the student. Passpoint uses adaptive NCLEX-style questioning to simulate the NCLEX-RN. VSim is a computerized virtual patient simulation where simulations are carried out based on the National League of Nursing Scenarios. Docucare provides a computerized documentation system to emulate technology common in the clinical setting. StatRef!, a free service with varying books, is offered by the NC Community College System and is accessible through SCC’s library resources.

C. Testing Procedures:

1. A proctor will be available during testing periods to answer questions regarding typographical errors. No other questions will be answered during a test. Students must be on time for the scheduled exam.

2. Before the test, all items will be stored at the front of the classroom except for pencils, clean scrap paper when necessary, and a calculator issued by the proctor.

3. During the test, students will not be allowed to leave the room. Students should review their scantron test for completeness before handing it in. Once tests are handed in, they will not be returned. In the event the student needs to use the bathroom, a proctor will escort the student.

4. All test papers must be returned after the testing period. Tests are not allowed to leave the classroom.

5. Students are not allowed to wear hats into the classroom on scheduled test days.

6. Faculty believes learning should be on-going and all-inclusive. Therefore, we reserve the right to include content from previous semesters on tests.

7. Moodle resources will be hidden from viewing at the beginning of each testing period. This includes access to notes, videos, lectures, etc. for the material being tested on. Material will be re-opened after test review.
7. Attendance:

A. Scheduled Exams:

1. Absence for scheduled exam
   a. In the event a student needs to be absent for a scheduled exam, the student will notify the instructor of record prior to the testing period by phone or email. The student will take the alternate exam on a day at the instructor’s discretion or receive a zero for that exam. Time and date of the exam are to be arranged by the instructor and arranged by the student with testing center hours of operation. Students are expected to be on their honor not to discuss the test with classmates before taking it. Instructors reserve the right to use a comparable test in a different format.
   b. Failure to notify the instructor of your inability to take the scheduled exam prior to the scheduled test time will result in a zero for that exam.

2. Tardy for scheduled exam
   a. Students tardy on the day of the exam will not be allowed to take the test, and will have to take a comparable alternate test in a different format at a date and time determined by the instructor.

B. Lab Attendance:

Lab attendance is required as it prepares each student for clinical experience. Failure to attend lab may result in lack of preparation for clinical. Skills must be satisfactorily completed in lab prior to being performed in clinical. Students who do not meet this requirement will be sent home from clinical. This will constitute an absence and the clinical absence policy will be enforced. Missed labs must be re-scheduled with the lab instructor and made up within one week of the scheduled lab. It is the student’s responsibility to reschedule. Failure to make up a lab within the one-week period will result in the inability to attend clinical due to lack of preparation.

All procedures must be performed according to the current textbook being utilized. Students are allowed two opportunities to correctly demonstrate a skill in lab. If the student does not demonstrate the skill successfully after two opportunities, he/she will be withdrawn from the nursing program. A student will only be allowed to perform a skill during a clinical experience if the skill has been satisfactorily completed in the lab or at the discretion of the clinical instructor. The student is responsible for maintaining an updated skills check-off sheet throughout the course of the program.
Some lab assignments are self-paced modules on Moodle and seated lab hours may be completed through this method. Participation in all lab modules is expected and material from modules may be used on tests. Students are responsible for completing online modules and communicating with other students/instructors regarding module content through the use of discussion boards on Moodle.

C. Clinical Attendance:

**Students are expected to attend all clinical experiences.** This includes all isolated clinical learning experiences scheduled for clinical days in addition to all client care situations. Policies relative to clinical experiences are enforced for all isolated clinical learning activities.

When a student is going to be absent from clinical practice, she/he must notify the instructor prior to the scheduled clinical time. It is the student’s responsibility to call and talk with the instructor **in person**. If the student is unable to reach an instructor immediately, a message should be left with a staff member in the appropriate clinical department. A student who leaves early from a clinical rotation will forfeit the hours he/she accumulated during that day. Students who are absent from a stand-alone / observational / alternative style clinical experience will still be required to meet the objectives of that clinical experience through alternative means to be determined by the clinical coordinator.

**Students who miss more than 14 hours of the clinical experience in a semester will not progress and will be dropped from the program at that point.**

The only acceptable reasons for students leaving the clinical area early are personal sickness (see F below) or an emergency situation. Students must obtain approval from their instructor to leave the clinical area prior to the scheduled departure time.

Any student, who works 11-7, 12-8 or any other night shift prior to a clinical day, will be asked to leave the clinical area unit and will be given an absence for the clinical day involved. Sleep impairment on the part of the student nurse is a detriment to client safety.

If a student is at any time found to be unprepared as specified under performance criteria, he or she will be told by the clinical instructor to leave the clinical area. This will constitute a clinical absence.

If the student has not had any clinical absences or tardies in a semester, the student will receive one point added to the final grade. Points will **only** be added if the student has achieved a passing grade in theory and clinical. (See Points Policy.)

D. Clinical Tardies:

Tardy is defined as arriving at the clinical area at a time later than the scheduled meeting time.

If the student arrives tardy to the clinical site, he/she will be sent home, and this will be considered a clinical absence.
E. Messages:
   1. Because of the limitation of the switchboard, telephone messages, not of an emergency nature, cannot be handled by the school. If a family member needs to contact you in the event of an emergency, have him channel the call through Student Development. Student Development will decide the appropriate course of action.
   2. Telephones in the instructor offices are not to be used for personal use.
   3. Identical limitations apply to the hospital situation. Callers are to direct their messages to the appropriate instructor rather than to the student. Instructors will be responsible for notifying the students of messages. **No visitors are allowed in the clinical area.**
   4. **Cellular phones, Ipods, etc. are not to be brought in the clinical area.**

F. Illness during Clinical Attendance:
   If a student becomes ill during clinical practice, the student should notify his/her instructor and proceed as directed by the instructor. Leaving the clinical setting due to personal illness forfeits any time spent that day and counts towards your total time that can be missed. Students will not be treated on the clinical unit. All costs involved in medical treatment are the responsibility of the individual student.

8. Clinical Evaluation:
   A clinical grade of **“Pass”** or **“Fail”** will be earned by the end of the semester. A “Pass” grade indicates that the student has met all clinical objectives as outlined in the End-of-Semester Clinical Evaluation Tool for each course. The end-of-semester clinical evaluation tool is supported by the weekly clinical summary. A clinical grade of “Fail” will result in failure to progress.

A. Remedial Skill Form:
   A student may receive a remedial clinical work form if he/she does not properly demonstrate a skill or knowledge in the clinical area. The student must review this skill in the appropriate text, practice the skill in the lab, and demonstrate it to the clinical coordinator within one week prior to returning to the clinical site. (See Appendix ii.)

B. Unsafe Clinical Incident:
   An unsafe incident is the occurrence of a situation in a clinical setting in which the behavior of a student did endanger or potentially endanger the patient/student/faculty’s welfare. Clinical settings include nursing labs, simulation lab, and off-campus clinical affiliated sites. It may also be defined as any unprofessional or inappropriate behavior as determined by the nursing faculty. Such an incident is one which could have been avoided by application of learning objectives previously covered. (See Appendix iii.)
An unsafe incident occurrence will result in immediate dismissal from the clinical setting and placement on clinical probation (see C below). The faculty involved must report the incident to the Clinical Coordinator and the Program Director along with written documentation. The Program Director will then call a meeting of the ADN faculty to review and evaluate the situation. The student will be given the opportunity to meet with the faculty as a part of the review process. The student will not be permitted to return to the clinical setting until resolution. If it is determined by the nursing faculty that the student has demonstrated behavior which conflicts with sound nursing practice or safety, the student will be withdrawn from the course and dismissed from the ADN program by the Program Director, in collaboration with the Dean of Student Outreach & Support and the Associate VP of the School of Health Sciences & Public Services. Students so removed will be referred to the Dean of Student Outreach & Support for further investigation and/or dismissal from the college.

Students, who wish to appeal the faculty decision, must follow the grievance policy.

C. **Clinical Remediation/Probation:**

A student may receive an “Unsatisfactory” evaluation in clinical for reasons which include, but are not limited to, the following:

- less than satisfactory clinical performance
- unsatisfactory written assignments
- medication errors and/or performing any procedure or giving any medication without securing appropriate supervision designated by the instructor.
- HIPAA violation
- late assignments

A student who earns 2 “U” evaluations during the semester will automatically be placed on clinical probation, and remediation will be instituted. An unsafe incident in the clinical area shall result in clinical probation if student is not dismissed from the program (See B above), and remediation will be instituted.

The student will meet with the Course Coordinator or Clinical Coordinator, and remediation will be determined. Any remedial work must be completed at a date determined by the clinical coordinator. There will be scheduled advising throughout the probation period between the student and the Course Coordinator or Clinical Coordinator. The student will be removed from clinical probation when satisfactory clinical performance is exhibited as evaluated by the clinical instructor and the clinical coordinator.

Any additional “U” evaluation – (during the current semester or during the probation period if it extends into the following semester) – received during clinical or for not completing remediation
as directed by the faculty, will constitute a Failing (F) grade for clinical. The student will be dropped from the program at that point and receive a failing grade for the semester in that nursing course. The student whose probationary period extends into the next semester will receive an Incomplete (I) grade and will have a specified date given by the course coordinator to complete the remediation or receive an “F” for the course.

D. Assignments linked to end-of-semester clinical summary
Satisfactory and unsatisfactory assignments of each NUR course are linked to the end-of-semester clinical summary, which is different from an unsatisfactory issues on the weekly clinical summary. An unsatisfactory evaluation on the end-of-semester clinical summary will result in a failing grade for the course. An unsatisfactory grade on any non-clinical assignment listed in the evaluation portion of the course syllabus will also result in a failing grade for the course.

E. Simulation:
Simulation activities in the Simulation Hospital at Stanly Community College include simulated clinical scenarios, simulated task training, simulated patient scenarios, debriefings, and/or discussions. In order to preserve the function and quality of the equipment and to enable future students to benefit from the Simulation Hospital at Stanly Community College, students will be expected to follow the rules and regulations that govern the lab each semester. In addition, all simulation activities are considered confidential, whether electronic, written, verbal, observed or overheard, and may not be disclosed or discussed outside of the simulation environment. Any participants (e.g., students, learners, educators, instructors, faculty, staff or observers) in simulation activities are expected to behave in a professional manner and maintain confidentiality. Any sharing, posting to social media, discussion, recording, reproducing, revealing or disclosure of simulation activities or performance is a violation of policy and may be grounds for disciplinary and/or legal action. Students will be asked to sign a confidentiality agreement at the start of each semester and are obligated to report any violations of confidentiality to the simulation faculty member.

F. Clinical Sites:
Students are not guaranteed certain shifts or days for clinical assignment. Assignment is based on site availability and may include days, evenings, nights, and any day of the week, including weekends. Clinical sites specific to the course learning outcomes can be found within each course syllabus.
G. **Clinical progression in NUR 213:**

Students must be passing NUR 213 with a score of “80” or above after taking the Mid Term Exam. Failure to do so will result in the student being unable to participate in the clinical component of NUR 213 and, consequently, being dropped from the ADN program.

H. **Students wishing at any time to appeal a decision made by the clinical coordinator must first discuss it with the clinical coordinator and course coordinator. If there is no resolve to the issue, then clinical appeals follow the grievance policy as outlined in the college policies.**

9. **Moodle policy:**

Students use Moodle2.3 as the portal to communicate with their peers and instructors.

Internet Etiquette, Netiquette, is expected to be exercised by students and faculty using Moodle to post discussions. This is listed as a reference in all Moodle courses within the nursing program.

10. **Self-service:**

Students will be able to get their grades only through Self-service. In addition, SCC will use the student email accounts for correspondence to the student. It is the student’s responsibility to check their email account for important information. Access to Self-service and Gmail accounts is located on the Student Resource page from [www.stanly.edu](http://www.stanly.edu).

11. **Online Learning Management System Statement:**

A component of this online class content is streaming video presented via Moodle. This technology is distributed based on current standards as established by Microsoft. Students have the responsibility to make sure the equipment they will use to complete this online class is configured to receive this streaming video. While the SCC HelpDesk at [DLHelpDesk@stanly.edu](mailto:DLHelpDesk@stanly.edu) will work with each student to troubleshoot connection problems, SCC is not responsible for the student’s home computer setup. Students who have difficulty viewing the online content of the course are strongly advised to attend the seated class.

12. **Online Learning Management System Video Content and Access:**

The lecture/class videos are generated for the use of web-based/hybrid students, who should refer to the online policy within the syllabus for resolution of viewing issues. The seated students are granted access to the videos but are expected to physically attend class. The inability to view the video content on a home computer does not relieve the student’s responsibility of meeting the requirements of the class.

The videos are not available in a downloadable file format. No efforts should be made to circumvent the security protocols. Please refer to the Student Computer and Network Use Policy of the college. The policy is accessible through [www.stanly.edu](http://www.stanly.edu).

13. **Online Policy:**

Online students are self-learners who are able to maintain the high motivation needed to succeed in a course. Occasionally, problems with technology may occur, and these can be very frustrating for the student. The college is dedicated to resolving those problems; however, to do that we need your
collaboration. The following guidelines have been established to ensure that any problems you may encounter with technology are quickly resolved.

1. Although you may not elect to watch the lecture immediately, online students must validate that they are able to view the lectures within 24 hours after the scheduled lecture date. Please allow 24 hours for the lecture to be uploaded to the online course. Checking that you are able to view the lecture will help us get an early start if there are any problems.

2. Communication is essential. At 24 hours, if you continue to experience difficulty viewing the lecture, please email the Learning Management System (LMS@stanly.edu) or contact them via telephone at 704-991-0222. Ongoing communication to let us know if you are still having problems or if the problem has been resolved is very important.

3. At any time, if you are having difficulty viewing lectures or using Moodle, you are always welcome to join the seated class and labs or to use an available computer at either the Crutchfield or Albemarle campus.

Stanly Community College and the Associate Degree Nursing Program want your online experience to be successful. This can be achieved only when Moodle staff, nursing faculty, and students work together.

14. Points Policy:

Test Review:
Students have the opportunity to participate in a group test review when offered by the instructor. Group tests are at the discretion of the instructor. Students testing with the class are able to re-take the same test with a group of classmates. This is voluntary. Students in each group will submit one answer sheet. Those groups which score an ‘A’ on the re-take will have one point added to the test score of every person within the group. This is done in order to foster critical thinking as questions are debated within groups.

Attendance at faculty meetings:
It is vital that the faculty have input from students regarding program issues. ADN club officers will be notified regarding upcoming faculty meetings. If the ADN club officers are not able to attend a meeting, a substitute class representative may attend. If the class (1st level, 2nd level) has a representative present at every faculty meeting for the semester, each student in the class with a final semester grade of 80 or greater will receive the appropriate points listed below added to the final semester grade.

Participation in ADN Club Activities:
The faculty recognizes that the program is challenging and that many nursing students have families, work, and have responsibilities outside of college. However, because community involvement is an important factor in the development of a professional nurse, each student with a final semester grade of 80 or greater will receive the appropriate points listed below added to the final semester grade for meeting ADN club participation guidelines, which are established by the students and Club Advisors.

Clinical Attendance:
Competencies within the nursing program cannot be accomplished without clinical attendance. Because clinical hours are limited and many experiences are unique to a specific semester, attendance is considered paramount. Students are expected to attend all clinical experiences and arrive on time. This is a reflection of work ethic. Clinical days should only be missed in the event of sickness or emergency. Each student with a final semester grade of 80 or greater who has perfect clinical attendance will receive the appropriate points listed below added to the final semester grade.
15. Medical Release:
A student with changes at any time during the length of the program in his/her medical condition from what is documented on the student medical form is required to notify the course coordinator and clinical coordinator within 48 hours of the hospitalization or care. Changes in condition which must be communicated include, but are not limited to pregnancy, childbirth, fractures, all surgical procedures, etc. The student is to provide a release by the medical professional providing care in order to return to the classroom, lab, and clinical settings. All areas must be addressed on the medical release.

The program performance standards noted in the ADN Student Handbook must be maintained in order to provide safe care to clients and to provide a safe environment for learning.

During the active dates under the care of a medical professional through the release date, access will be denied to re-enter the classroom, lab, and clinical settings, including Moodle access, unless the medical release specifies differently. Access will be restored based on the date of the release.

Immediate dismissal from the program will result if this policy is breached by the student. As determined by the Course Coordinator and the Director of Nursing, when the student is unable to complete course requirements the student will be withdrawn from the course and subsequently unable to progress in the program or an incomplete grade will be issued to the student. If applicable, the student may reapply to the program using the readmission/advanced standing policy.

16. College Policies:
College policies are found on the SCC website at https://www.stanly.edu/future-students/collegecatalog/policies. These include, but are not limited to, all of the following: Plagiarism; Human Subjects Policy; Social Media; Student Code of Conduct; Class Attendance; Drop/Add Never; Attended Withdrawal; Student Rights and Responsibilities; Computer and Network User; Software Copyright; Weather Notification; Inclement Weather; Electronic Signature; Email Use; Grade Change; Incomplete Grade Policy; Student Grievance; Religious Observance; Online Student Access to Counseling Services; Online Student Access to Financial Aid Services; Online Student Access to Library and Learning Resource Center Services; Procedures for Online Students in Filing Complaints; and Technical Assistance for Online Curriculum Students and Faculty.

17. ADA Statement:
ADA Statement: If you have a disability that may affect your academic performance and are seeking accommodations, it is your responsibility to inform the ADA services office located in SB220. You
may contact Megan Brehun at (704) 991-0161 or mbrehun6994@stanly.edu if you have any questions concerning disability services. You may also visit https://www.stanly.edu/future-students/college-catalog/student-support-services/disability-services-ada to learn more about ADA services at Stanly Community College. It is important to request accommodations early enough to give the ADA services office adequate time to consider your request and recommend reasonable accommodations. Students are encouraged to initiate the request process 30 days prior to the beginning of a semester or class. Accommodations are not retroactive and can only become active after all required documents are submitted. Instructors will provide necessary accommodations based solely on the recommendations of the ADA services office.

18. Religious Observance Policy:
Stanly Community College recognizes the existence of diversity in religious beliefs. Out of respect for individual religious convictions, the College will allow two excused days of absences per academic year. At least two weeks prior to the leave the student must submit in writing to all of his/her instructors for the term what day(s) he/she requests as a religious observance. The student will be given the opportunity to make up any class work, clinical/co-op hours, or tests missed during the excused day(s).

For the Nursing Program, the student must submit in writing to all of his/her instructors for the term what day(s) he/she requests as a religious observance by the second day of class. Changes to the schedule may be made at the instructor’s discretion.

19. Security Alerts:
All students will be notified of security alerts via a banner posted on the SCC website, SCC Student email, home phone, and cell phone. Students must update their contact information immediately after a change has occurred to insure communication is received.

20. Honesty:
All students are expected to be honest with faculty and staff in all situations related to clinical and academic activities. Students witnessing any dishonest activity are required to bring it to the attention of a faculty member. Resubmission of work completed for any previous course cannot be submitted for a future course assignment and will not be accepted. Failure to abide by this policy is considered a violation of the honor code and will result in disciplinary action as noted in the Stanly Community College catalog.

21. Social Media Policy:
The Annie Ruth Kelley Associate Degree Nursing Program defines social media to include online platforms such as professional or social networking, posting commentary or opinions and sharing pictures, audio, video, or other content which includes, but not limited to Facebook®, Linkedin®, Snapchat®, YouTube™, Twitter™, blogs, message boards, professional forums and chat rooms. The use of social media bearing any Stanly Community College name or affiliation are only for educational purposes. Students may use social media to enhance learning, inform the public about college activities and developments, and shall allow participants to share freely without cyberbullying.

Students shall maintain confidentiality of patient information, as well as conduct themselves professionally at all times. At no time should a student make commentary, derogatory or otherwise, regarding patients, families, clinical staff, classmates, faculty or SCC in social media. Students are reminded that what they do outside of the practice setting may affect how they are perceived.
professionally. Nursing faculty support the guidelines for use of social media provided by the National Council of State Boards of Nursing (NCSBN), the American Nurse Association (ANA), and the NC Board of Nursing white paper. Evidence that a student violates this policy is considered grounds for disciplinary and possibly legal action, resulting in possible dismissal from the nursing program. Students are not to contact instructors through social media while in the program. Students should direct all communication outside of class through the correct Moodle course or the instructor’s SCC email. Instructors will not contact currently enrolled students through social media.

https://www.ncsbn.org/NCSBN_SocialMedia.pdf
http://www.nursingworld.org/FunctionalMenuCategories/AboutANA/Social-Media

22. Miscellaneous:

A. Nursing Club: Election of class officers is advised in order to establish a direct route of communication between faculty and students. Students shall hold class meetings on their own time and should not conflict with SGA activities. A nursing organization including both levels of nursing students has been established. All students are encouraged to participate in this organization. The ADN student organization will hold periodic meetings. The purpose of these meetings will be to provide support and cohesiveness among members of both first and second year classes and to encourage a sense of professionalism within ADN students.

B. ADN Handbook Statement: Students are expected to retain a copy of the Nursing Department Student Handbook for the duration of the program. On the first day of class, students will be asked to sign a statement to the effect that they have received and understand the content and the responsibilities imposed by the Handbook. The instructors will consistently abide by these policies and expect students to do the same. Updates to the handbook will be sent electronically to students through Moodle email at the time of the update. Students are further bound to abide by hospital policies/requirements presented during facility orientation and to all SCC policies applicable to the ADN student.

C. If the student is employed by a facility which is used as a clinical facility by the SCC Nursing Department, the student should be aware that the nature of those responsibilities should in no way be related to his/her responsibilities as a student and the student uniform may never be worn while functioning in roles outside of school clinical assignments. The employing facility takes full responsibility for the student employee’s action while working.

D. All nursing students must carry malpractice liability insurance. Verification of insurance coverage must be uploaded to the online tracking system used by SCC, Castlebranch, before the student will be allowed to attend the first clinical experience. The student must purchase the liability insurance when tuition is paid each fall and spring semester.

E. NCLEX-RN Review: Students are encouraged attend a seated or online NCLEX-RN review between the end of the program and taking the NCLEX-RN. Information will be distributed to all second year students.

F. Citing Sources: Students are expected to use current reference material on all assignments. Sources should be no more than 5 years old. Historical data is the one exception. APA format is used for all nursing courses.
23. Associate Degree Nursing Readmission/Advance Placement Admissions Policy

A. Generic Cohort

Students seeking readmission or advanced placement to Stanly Community Colleges Associate Degree Nursing program must submit an application for readmission to the SCC Admissions Office and satisfy the programs initial admission requirements.

Students will be permitted to reenter the nursing program no more than once.

General information for any student seeking advanced standing:

Specifically for students formerly enrolled in SCC’s ADN Program and are returning within 2 years:

Students seeking readmission who were formerly enrolled in the ADN program at Stanly Community College and wish to reenter within two years of exiting the program, must reenter the semester immediately following their last successful NUR class (example: if a student successfully completes NUR 112 and subsequently withdraws, he/she must reenter the nursing program beginning the semester immediately following NUR 112). All nursing and general education courses required in the semesters preceding the intended point of reentry must be satisfactorily completed.

Specifically for students formerly enrolled in SCC’s ADN Program and are returning after 2 years:

Students who enter SCCs ADN program after having withdrawn from an ADN program more than two years earlier will restart the program as a new student if only admitted once previously. NUR 117 (Pharmacology) will need to be repeated for credit to ensure safety of patient care.

Specifically for students formerly enrolled in another institution besides SCC’s ADN Program and attempting to enter SCC’s ADN Program:

Applicants for advanced standing admission who have completed nursing (NUR) courses at institutions other than Stanly Community College must provide the ADN program director with a complete transcript of credits earned at the other institution and a syllabus for each nursing course completed. The ADN program director will review these documents and determine the appropriate beginning point for the applicant. If transcripts prove the student has not had a standalone pharmacology course (NUR 117) or college study skills course (ACA 111), then the student will be required to satisfy those courses through SCC.

Steps:
1. Students seeking advanced standing status must first complete an application as advanced standing for the term (Fall, Spring, Summer) and year of reentrance. If you are a student from another institution seeking advanced standing status, then the term and year will be determined after your syllabi have been reviewed by the Director of Nursing. To qualify for admission as advanced standing, an applicant must submit a properly completed application for admission no later than 30 days preceding their intended start date.

2. After applying for the term and year of reentrance, admissions will determine if you meet the required GPA. Only those students with a GPA of 2.5 or higher in their major at the time of readmission to the ADN program will be considered for readmission. That GPA must stand up to
the point of readmission if additional courses within the course of study are taken while not an actively enrolled nursing student. A student’s GPA in major will include only nursing and nursing related courses completed, either successfully or unsuccessfully, up to the point of readmission. Students must hold a cumulative GPA of 2.0 for all courses previously taken at SCC.

3. **Readmission to the nursing program will be on a space available basis.** Qualified applicants will be accepted in relation to their TEAS Exam score. TEAS scores accepted are those taken at SCC only and must be within 2 years of restarting the program.

4. In addition to the TEAS exam, all applicants must complete the placement test (NC DAP currently being used) scoring the minimums indicated for admission to the ADN program. Applicants who are unable to score the minimums on the placement test may complete the general education courses required in the ADN program with a GPA of 3.0 and subsequently be considered for admission. Placement test scores are accepted within the last 5 years and may be transferred from another institution. **Be aware that placement test scores and TEAS scores must be active at both time of application and upon entering the program; therefore, time should be allowed to retake the placement test and/or TEAS if necessary and early communication with admissions is imperative.**

5. Students wishing to transfer into SCC's ADN program must (1) successfully complete a **written competency exam** covering all SCC NUR courses the student has received transfer credit for, and (2) successfully complete selected **skills competencies** administered by the SCC nursing department. This is in addition to the general admission requirements for the ADN program. Students should contact the ADN Program Director well in advance of the entering semester to arrange for a test breakdown of the written competency, a list of skills, any outstanding admission requirements, and instructions for scheduling the competency test. Students only have one **attempt** to successfully pass the competency exam and skills competencies. If a student does not successfully pass the exam or skills on the first attempt, the student is ineligible for transfer into the program.

6. A complete physical is required. A blank medical form will be mailed to the applicant upon acceptance for readmission. **All required immunizations must be current for full acceptance into the ADN program.**

7. Applicants applying for readmission / advanced standing are required to complete a new criminal background check and drug screen.

8. **Current certification in Healthcare Provider CPR must be submitted prior to re-enrollment.**

9. If an otherwise qualified applicant is not accepted for readmission due to space limitations, he must submit another application for readmission if he wishes to be considered in a subsequent year.
Special Circumstances:
For applicants previously enrolled in Stanly Community College’s ADN program and who were withdrawn after having been unsuccessful in NUR 117 or NUR 111, the following will apply:

- Student who fails or withdraws from NUR 117 (Pharmacology) and successfully completes NUR 111 (Intro to Health Concepts):
- May apply for advanced standing admission to the second semester of the ADN program and will follow the nursing guidelines for readmission including competency testing in NUR 111.
- Must successfully complete NUR 117 (Pharmacology) prior to readmission to the program.

Any student who withdraws from NUR 117 and continues to have clinical experiences within the NUR 111 course, shall also withdraw from NUR 111. Those students will not be considered safe in the clinical setting in regards to medication administration; therefore, progression is not achievable. Students in this case will need to reapply to the program as a new applicant with admissions.

- Student who fails or withdraws from NUR 111 (Intro to Health Concepts) and successfully completes NUR 117 (Pharmacology)
- Must apply for admission as a new entering freshman and complete NUR 111 (Intro to Health Concepts) for credit.
- Must successfully complete a competency exam for NUR 117 (Pharmacology) prior to registering for NUR 112 (Health Illness Concepts).

- Student who fails or withdraws from NUR 111 (Intro to Health Concepts) and NUR 117 (Pharmacology) must apply for admission as a new entering freshman.

B. LPN-RN Associate Degree Nursing Readmission/Advance Placement Admissions Policy

Students seeking readmission or advanced placement to Stanly Community Colleges Associate Degree LPN-RN Nursing program must submit an application for readmission to the SCC Admissions Office and satisfy the programs initial admission requirements.

Students will be permitted to reenter the LPN-RN program no more than once.

General information for any LPN-RN student seeking advanced standing:

Specifically for students formerly enrolled in SCC’s LPN-RN Program (A45110R) and are returning within 2 years:
Students seeking readmission who were formerly enrolled in the LPN-RN program at Stanly Community College and wish to reenter within two years of exiting the program, must reenter the semester immediately following their last successful NUR class (example: if a student successfully completes NUR 214 and subsequently withdraws, he/she must reenter the nursing program beginning the semester immediately following NUR 214). All nursing and general education courses required in the semesters preceding the intended point of reentry must be satisfactorily completed.

**Specifically for students formerly enrolled in SCC’s LPN-RN Program and are returning after 2 years:**

Students who enter SCC's LPN-RN program after having withdrawn from an LPN-RN program more than two years earlier will restart the program as a new student if only admitted once previously. NUR 117 (Pharmacology) will need to be repeated for credit to ensure safety of patient care.

**SCC LPN-RN Program does not accept advanced placement students from other institutions.**

**Steps:**

- Students seeking advanced standing status must first complete an application as advanced standing for the term (Fall, Spring) and year of reentrance. To qualify for admission as advanced standing, an applicant must submit a properly completed application for admission no later than 30 days preceding their intended start date.

- After applying for the term and year of reentrance, admissions will determine if you meet the required GPA. Only those students with a GPA of 2.5 or higher in their major at the time of readmission to the ADN program will be considered for readmission. That GPA must stand up to the point of readmission if additional courses within the course of study are taken while not an actively enrolled nursing student. A student’s GPA in major will include only nursing and nursing related courses completed, either successfully or unsuccessfully, up to the point of readmission. Students must hold a cumulative GPA of 2.0 for all courses previously taken at SCC.

- Readmission to the nursing program will be on a space available basis. Qualified applicants will be accepted in relation to their TEAS Exam score. TEAS scores accepted are those taken at SCC only and must be within 2 years of restarting the program.

- In addition to the TEAS exam, all applicants must complete the placement test (NC DAP currently being used) scoring the minimums indicated for admission to the ADN program. Applicants who are unable to score the minimums on the placement test may complete the general education courses required in the ADN program with a GPA of 3.0 and subsequently be considered for admission. Placement test scores are accepted within the last 5 years and may be transferred from another institution. **Be aware that placement test scores and TEAS scores must be active at both time of application and upon entering the program; therefore, time should be allowed to retake the placement test and/or TEAS if necessary and early communication with admissions is imperative.**

- Students wishing to return to the LPN-RN program as advanced standing must (1) successfully complete a **written competency exam** covering all SCC NUR courses.
the student has received transfer credit for, and (2) successfully complete selected **skills competencies** administered by the LPN-RN Clinical Coordinator. This is in addition to the general admission requirements for the ADN program. Students should contact the Associate Director of Nursing well in advance of the entering semester to arrange for a test breakdown of the written competency, a list of skills, any outstanding admission requirements, and instructions for scheduling the competency test. Students only have **one attempt** to successfully pass the competency exam and skills competencies. If a student does not successfully pass the exam or skills on the first attempt, the student is ineligible for re-entrance into the program.

- A complete physical is required. A blank medical form will be mailed to the applicant upon acceptance for readmission. All required immunizations must be current for full acceptance into the ADN program.

- Applicants applying for readmission / advanced standing are required to complete a new criminal background check and drug screen.

- Current certification in AHA Healthcare Provider CPR must be submitted prior to re-enrollment.

- If an otherwise qualified applicant is not accepted for readmission due to space limitations, he must submit another application for readmission if he wishes to be considered in a subsequent year.

**Special Circumstances:**
For applicants previously enrolled in Stanly Community College’s LPN-RN program and who were withdrawn after having been unsuccessful in NUR 117 or NUR 214, the following will apply:

- Student who fails or withdraws from NUR 117 (Pharmacology) and successfully completes NUR 214 (Nursing Transition Concepts):
  May apply for advanced standing admission to the second semester of the LPN-RN program and will follow the nursing guidelines for readmission including competency testing in NUR 214.
  Must successfully complete NUR 117 (Pharmacology) prior to readmission

- Student who fails or withdraws from NUR 214 (Nursing Transition Concepts) and successfully completes NUR 117 (Pharmacology)
  Must apply for admission as a new entering freshman and complete NUR 214 (Nursing Transition Concepts) for credit.
  Must successfully complete a competency exam for NUR 117 (Pharmacology) prior to registering for NUR 221 (LPN-RN Transition Concepts I).

- Student who fails or withdraws from NUR 214 (Nursing Transition Concepts) and NUR 117 (Pharmacology) must apply for admission as a new entering freshman.
24. Criteria for Graduation:
To be eligible for graduation, a student must:

1. Successfully pass all course requirements in major with an overall major grade point average of 2.00 or higher.
2. Complete an application for graduation when registering for your last class.
3. Pay a graduation fee at the time of registration for the last semester of enrollment.
4. Earn at least one-fourth of the credits required for a degree, diploma, or certificate from Stanly Community College.
5. Fulfill all financial obligations to the College.
6. Graduation exercises are held on the dates published in the Academic Calendar. During graduation exercise candidates must be dressed in proper academic attire as determined by the President of the College.

25. Pinning:
The Pinning Ceremony is a dignified event sanctioned by the nursing faculty. It is a formal means for students to pay tribute to each other, family, friends, and faculty and a time for faculty to recognize students who have shown outstanding achievement and/or professional growth. The place, time, and date of Pinning are approved by the Director of Nursing and the President of SCC. Guidelines are shared with the senior class by the nursing club advisor. Nursing faculty reserve the right to rescind this privilege at any time.

26. Licensure:
A. The Director of the Nursing Program verifies a student with the North Carolina Board of Nursing as a candidate for the National Council Licensure Examination for Registered Nursing based on academic achievement and professional accountability following graduation.
B. The North Carolina Board of Nursing may deny licensure to individuals convicted of a felony or any other crime involving moral turpitude.

REMEDIAL SKILLS FORM

Date Issued: ________________

The student __________________________ needs remedial work in the following skill __________________________

______________________________

Remedial Objectives: The student will:

1. Review the appropriate text for the procedure in performing the skill.

2. Practice the skill in the lab.

3. Demonstrate the skill to an Instructor in the lab.

4. Achieve a satisfactory on the performance of the skill in the lab.

5. Return the lower portion of this remedial work slip to the CLINICAL INSTRUCTOR who issued it.

6. Complete the remedial objectives within ONE WEEK from the time it was issued.

Date Issued: ____________________________ Date Completed: ________________

This student __________________________

______________________________ has successfully completed all the remedial objectives for the following skill:

STANLY COMMUNITY COLLEGE

REPORT: UNSAFE INCIDENT IN THE CLINICAL SETTING

CRITICAL INCIDENT DEFINED:

An incident in the clinical setting involving a student in which:

A. The conduct and/or performance of the student did or potentially did endanger client welfare.

B. The incident could have been prevented by application of learning objectives previously covered.

DESCRIPTION OF INCIDENT (BY STAFF AND/OR INSTRUCTOR):

____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________

Date of Incident Location of Incident

Instructor Signature Date

PERCEPTION OF INCIDENT (BY THE STUDENT):

____________________________________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________

Student Signature Date
A student may receive an “Unsatisfactory” evaluation in clinical for reasons which include, but are not limited to, the following:

1. less than satisfactory clinical performance
2. unsatisfactory written assignments
3. medication errors and/or performing any procedure or giving any medication without securing appropriate supervision designated by the instructor.
4. HIPAA violation
5. late assignments

A student who earns 2 “U” evaluations during the semester will automatically be placed on clinical probation, and remediation will be instituted. The student will meet with the Course Coordinator or Clinical Coordinator, and remediation will be determined. Any remedial work must be completed at a date determined by the clinical coordinator. There will be scheduled advising throughout the probation period between the student and the Course Coordinator or Clinical Coordinator.

The student will be removed from clinical probation when satisfactory clinical performance is exhibited as evaluated by the clinical instructor and the clinical coordinator.

Any additional “U” evaluation – (during the current semester or during the probation period if it extends into the following semester) – received during clinical or for not completing remediation as directed by the faculty, will constitute a Failing (F) grade for clinical. The student will be dropped from the program at that point and receive a failing grade for the semester in that nursing course. The student whose probationary period extends into the next semester will receive an Incomplete (I) grade and will have a specified date given by the course coordinator to complete the remediation or receive an “F” for the course.

Terms of Clinical Probation and Clinical Remediation Plan for student:

__________________________________________________________________________________________

__________________________________________________________________________________________

Timeline of unsatisfactory clinical events with dates:

__________________________________________________________________________________________

__________________________________________________________________________________________

Clinical Remediation Plan and Due Date with time:

__________________________________________________________________________________________

__________________________________________________________________________________________

Failure to successfully complete this clinical probation/remediation plan will result in not being able to return to the clinical site, inhibiting progression in the NUR program.
HEPATITIS: Hepatitis is a liver disease, initially resulting in possible inflammation of the liver, and frequently leading to more serious conditions including cirrhosis and liver cancer. In the United States, there are approximately 300,000 new cases of Hepatitis B Virus (HBV), the most prevalent form of Hepatitis, every year. While there is no cure for Hepatitis B, a vaccine does exist that can prevent infection.

HBV is most often transmitted through breaks in the skin or mucous membranes. This usually occurs through needlesticks, human bites, or having infectious material (such as blood or other body fluids) get into existing cuts or abrasions.

The symptoms of HBV infection are very much like a mild “flu”. Initially, there is a sense of fatigue, possible stomach pain, loss of appetite, and even nausea. As the disease continues to develop, jaundice (a distinct yellowing of the skin) and a darkened urine will often occur. However, people who are infected with HBV will often show no symptoms for some time.

After exposure, it can take 2 - 6 months for Hepatitis B to develop. This is extremely important, since vaccinations begun immediately after exposure to the virus can often prevent infection.

After completing the series of three immunizations, the Hepatitis B vaccine provides protection by building up a sufficient level of antibodies. The vaccine is specific to Hepatitis B and is not effective against other types of hepatitis nor does it protect against the HIV or AIDS virus.

If you feel that your work activities place you at risk for Hepatitis B, please consider the following before taking the vaccine.

You Should Not Take The Vaccine…

1. If you have an allergy to yeast.

2. If you are pregnant or nursing.

3. If you are planning to become pregnant within the next six months.

4. If you have had a fever, gastric symptoms, respiratory symptoms, or other signs of illness in the last 48 hours.

You may want to consult your own physician before taking the vaccine.
STANLY COMMUNITY COLLEGE

STUDENT RELEASE FORM
OFFICIAL HEPATITIS B IMMUNIZATION FORM

Part A:

I, ________, in compliance with OSHA guidelines agree to receive the Hepatitis B vaccine series. I have read the Important Information About Hepatitis B and Hepatitis B Vaccine sheet and understand I am at risk of contracting Hepatitis B due to my student related activities. I have participated in a formal education program provided by the College. I have been given the opportunity to ask questions and understand the risk factors involved. I thereby release Stanly Community College from responsibility for consequences of receiving the vaccine.

Consent to Release Information

I, ___________________________ consent to have my criminal background and drug screen checks shared with the clinical agency before my student privileges are begun.

I understand that the agency will decide whether or not to grant me student clinical privileges.

I understand that, depending on these results, I may not be allowed to participate in the clinical component of the nursing program and therefore be unable to progress.

I do not hold Stanly Community College responsible for any consequences that may result from the sharing of this information.

Stanly Community College (SCC), residing in Stanly County, Albemarle, North Carolina, regularly seeks students and alumni to feature in marketing and promotional materials. Your image, quotes, and/or artwork, may be used in print and/or electronic media for SCC, including, but not limited to: newspaper and magazine publications, radio advertisements, television advertisements, electronic media; including, but not limited to: social medial sites and/or the college website.

Please complete and sign the following release form:

I, _____________________________________________________________, hereby authorize SCC to use my image, quote and/or artwork for any use the college deems appropriate in the promotion and marketing of SCC.

I understand that my image, quotes and/or artwork may be used in print and/or electronic media for SCC, including, but not limited to: newspaper and magazine publications, radio advertisements, television advertisements, electronic media; including, but not limited to: social media sites and/or the college’s website at www.stanly.edu.

I understand that my quotes may be edited for content, but will not deter from the true spirit of the reference.

I understand that my image and/or my artwork may be altered (blemishes removed, red-eye reduction, cropping, lighten/darken, etc.).

I understand my name may be revealed.

I fully discharge SCC, its parent and affiliated companies and the respective officers, directors, trustees, employees, agents of each, including subcontractors, from any and all claims, monetary and otherwise, that I may have against SCC, its parent, affiliates or subcontractors, arising out of the use of my image, quotes or artwork.

I understand there is no financial or other compensation for my image, quotes or artwork.
