PHILOSOPHY OF THE ASSOCIATE DEGREE NURSING PROGRAM

Mission
The Associate Degree Nursing (ADN) program supports the missions of both the North Carolina Community College System and Stanly Community College (SCC). The faculty is committed to providing accessible, high quality nursing education to meet the diverse and changing healthcare needs of the service areas and to promoting the development of qualified life-long learners prepared for the professional role of registered nurse at the entry level. The philosophy of the ADN Program is derived from statements about health, quality of life, achievement of potential, the individual, environment, health, nursing, the practice, and education of the Associate Degree Nurse. Within this mission, the goal of nursing faculty is to foster quality and caring nurses for the individual, families and significant persons, and the community. The aim is to facilitate optimum health, quality of life and achievement of potential for the individual.

Vision
SCC’s ADN Faculty envision program graduates providing safe, competent nursing care within the Registered Nurse scope of practice after successfully meeting the educational requirements to take and pass the National Council Licensure Examination (NCLEX-RN).

Values
Values of the Nursing Program are the same as SCC. These include student success, community, equity, innovation, and excellence.

The Associate Degree Nurse
The practice of nursing is directed toward meeting the healthcare needs of individuals throughout their lifespan. The graduate of the ADN program at SCC is prepared to meet the educational competencies defined by the National League for Nursing and the Nursing Practice Act of North Carolina. The model of competencies derived by the National League for Nursing is noted below for all levels of education, including the Associate Degree Nurse:

**Associate Degree Nursing Education**

Nursing education at the associate degree level, in the North Carolina Community College System, is a process that facilitates changes in behavior, the acquisition of knowledge, skills, and attitudes necessary to function in the role of the entry-level nurse. The curriculum is conceptually based and founded on principles of culturally competent adult and collaborative learning. It incorporates evidence-based nursing theory and practice, general education, and the sciences in an environment conducive to learning.

The ADN Program at SCC provides an education that is flexible, progressive, and sensitive to the changing needs of the individual, significant support person(s), and community. Through these educational experiences, students will have opportunities to develop critical thinking and problem-solving skills, which can be applied in real-world application. SCC’s ADN program integrates three nursing roles into the educational experiences, including provider of care, manager of care, and member within the discipline.

The responsibility of the faculty of SCC’s ADN Program is to facilitate the student’s understanding and ability to meet the competencies for nursing practice through the design and evaluation of learning experiences. The nursing student is responsible for actively participating in learning experiences and developing the knowledge, skills, and attitudes necessary to provide quality client-centered nursing care. It is the belief of the nursing faculty that education is an interactive exchange between instructor and student.

**Conceptual Framework**

The conceptual model provides a mental scaffold or framework. The primary framework contains content related to the individual, the healthcare system, and nursing. The domains of the individual, the healthcare system, and nursing provide the conceptual framework guiding the associate degree nursing curriculum. Concepts are organized within each of these domains, and learning occurs from simple to complex. Supporting structures to the curriculum are related to client care and include quality of life, achievement of potential, and health.

The student is at the center of the conceptual model. The environment, which is noted as all-encompassing to the model, effects all structures of the model. Additional fundamental parts of the curriculum that are integrated throughout the program are the nursing process, communication and documentation, teaching/learning, caring, evidence-base practice and cultural diversity.

**Primary framework definitions and supporting structure definitions are found below:**

**Individual**

The faculty of SCC believe that each individual is a complex, multidimensional, unique, and significant being possessing inherent value and worth, and a member of a family, community, and culturally diverse society. All individuals have dynamic bio-physical, psychological, socio-cultural, spiritual, and developmental needs that contribute to health, quality of life, and achievement of potential.

Adaptation to the environment requires the individual to change throughout the lifespan. Each individual has a right to healthcare and to information that will assist him or her to participate actively in his or her healthcare in order to achieve the highest level of wellness possible. All individuals should be cared for, respected, nurtured, understood, and assisted. In order to provide care, act as a member within the discipline, and manage care, nurses must view the individual at the center of any nursing activity.
Healthcare System
The healthcare system encompasses a myriad of entities. These entities provide specific services related to the care of the individual. Services are aimed at promoting health, assuring quality of life, and achieving one’s potential.

Nursing
Nursing is not only a discipline of science, but also a life-long learning process. The process integrates knowledge and skills derived from biological, sociological, and behavioral sciences and information technology to deliver client-centered, culturally competent, holistic care. Through caring, empathy, ethics, and the development of a therapeutic relationship with the individual and significant support person(s), the nurse integrates the art of nursing with the scientific foundation for nursing practice utilizing the nursing process. By incorporating documented best practice, the nurse functions autonomously as manager of care and provider of care, and functions collaboratively as a member with the interdisciplinary team to promote health, quality of life, and achievement of potential.

Environment
The individual, as well as the student within this model, is in constant interaction with a changing environment that consists of both internal and external forces that varies throughout the lifespan and has the potential to cause stress in the individual/student. The goal for the individual/student is to utilize innate and learning coping mechanisms to adapt to these stressors.

Health
Health is a dynamic, ever-changing state of mental, physical, and spiritual well-being, which exists on a continuum from optimal wellness to illness and ending in death. The individual’s needs for healthcare are determined by his/her position on the continuum. Each individual’s health is based on his/her cultural perceptions and beliefs of health and illness and the ability to adapt to internal and external environmental forces. The individual is responsible for and capable of identifying, learning, and practicing health behaviors that can promote wellness, prevent illness, restore or maintain wellness, or achieve a dignified death.

Quality of Life
Quality of life, as it pertains to healthcare, is multifaceted and multidimensional. Standard indicators of the quality of life include not only wealth and employment, but also one’s environment, physical and mental, education, recreation and leisure time, and social belonging.

Achievement of Potential
Achievement of potential is the individual’s growth toward attaining one’s utmost ability and quality of life. It is based on the individual’s choices, perceptions, personal goals, life experiences, and holistic health. Cultural preferences are considered as they relate to one’s personal beliefs of achievement.

Timeline of the Annie Ruth Kelley Associate Degree Nursing Program

SCC’s ADN Program is one of 58 ADN programs in North Carolina, and one of 55 based at a community college. SCC began by offering the Licensed Practical Nurse (LPN) curriculum in 1973 and in 1974 graduated its first class of LPNs. SCC graduated a total of 119 LPNs before adding its two-year ADN program in 1985. The first graduates of the new two-year ADN program were awarded credentials in 1986. In 1999, SCC began operating a satellite ADN program on the Old Charlotte Highway campus of South Piedmont Community College. This arrangement continued until 2006 when SCC and South Piedmont Community College dissolved the relationship. In 2005, the college’s ADN program was named after Mrs. Annie Ruth Kelley as recognition of her part in the growth and success of the program. Currently, the nursing program of SCC is housed at the Crutchfield Education Center (CEC) in Locust, NC. Prior to the move to CEC in fall of 2013, the nursing program utilized two campuses, the main campus in Albemarle and the Locust CEC site fifteen miles apart.

The SCC ADN program is provided in a hybrid composition. The nursing (NUR) courses are delivered using the Interactive Video Room (IVR), a video conferencing system where an instructor is able to communicate to those students in seated class using CF 134/135 and communicate simultaneously with online students viewing the classroom discussion via Livestream if chosen. This communication is then recorded and flipped into video files for students to watch in an asynchronous fashion. Additional communication takes place between all students regarding questions related to course content via asynchronous discussion forums through the learning management system portal.

In 2010, SCC’s nursing faculty began the North Carolina Curriculum Improvement Project (NCCIP). Since the creation of a conceptual based learning approach to nursing, the curriculum has undergone complete overhaul and is continuously evaluated for areas of improvement. Spring of 2012 introduced the first graduating class to take the NCLEX-RN based on conceptual learning implemented in 2010.

The SCC Annie Ruth Kelley ADN Program is one that thrives on innovation. In addition to the delivery of course content mentioned above, we utilize the Simulation Hospital as a learning experience for students with faculty using best practices set forth by The International Nursing Association for Clinical Simulation and Learning (INACSL). Simulated clinical learning is a nonthreatening environment for students to practice critical thinking without the risk of patient harm. Efforts have been made to enhance real-life clinical experiences by incorporating interprofessional simulation scenarios. Spring 2015, fall 2015 and fall 2016 began the initial introductions of simulated nursing care with other disciplines (Respiratory Therapy, Radiology, Pharmacy Technicians, Emergency Medical Services, and Medical Assistants). More interprofessional care experiences are planned within the Simulation Hospital and with clinical partnerships. The 2017-2018 academic year marks an innovative collaboration with virtual care nursing as the faculty identified a virtual trend in healthcare. Students attend clinical in a virtual setting, utilize virtual collaboration methods in simulation, and virtual care staff utilize our facilities for Advanced Cardiac Life Support (ACLS) training.

Faculty commitment in our program is evident as faculty members hold pre-semester meetings to plan, mid-semester meetings to evaluate student progress, and post-semester meetings to evaluate outcomes. 2014 marked the first curriculum review and has since been an annual event of
faculty to identify strengths and weaknesses for program improvements. Our program endpoint involves each student behaving as a safe, culturally competent, entry-level nurse after passing the NCLEX-RN. This idea of providing the public with safe, competent nurses is supported by our governing body which gives us approval status and is agreed upon by all faculty employed within the nursing program. Therefore, each program student learning outcome was meticulously developed, as well as each course specific student learning outcome developed to show progression toward this culmination. Review of data, such as tests, test questions, clinical experiences, rubrics and other anecdotal documents used throughout the curriculum provide data to convey if the course specific student learning outcomes are met. This data further allows faculty to determine if specific areas need to be altered or if the specified criteria is supporting the intended outcomes. Student retention is continuously evaluated with implementation of retention efforts.

The spring curriculum review meeting of 2016 involved a group effort of identifying anchors for our program. Anchors are ideas that are in courses and cover the span of the ADN curriculum. Anchors agreed upon by all faculty included the idea of assessment, communication, (critical) thinking, and safety. This identification of curriculum anchors fostered the development of the acronym ACT Safe. Nursing faculty use this acronym to facilitate nursing education.

2018 marked the use of QSEN standards throughout the curriculum. Textbooks, simulation scenarios, and other methods of student learning and evaluation cultivate a nursing culture of knowledge, skills, and attitudes.

The changes of the program over the years, substantial or minute, continue to support the mission of the college to enhance the economic, social, and cultural life of the communities we serve by providing learner-centered environments that encourage access, success, and completion. Moreover, the mission of the nursing program is apparent; it provides accessible high-quality nursing education to meet the diverse and changing health-care needs of the service area and promotes the development of qualified students prepared for the professional role of registered nurse at the entry level.

**Accreditation and Approval Status**

The Annie Ruth Kelley ADN Program is part of SCC, which is Southern Association of Colleges and Schools (SACS) accredited. The program has full approval granted by the North Carolina Board of Nursing.

The Stanly Community College Associate Degree in Nursing program is accredited by the National League for Nursing Commission for Nursing Education Accreditation (NLN CNEA) located at 2600 Virginia Avenue, NW, Washington, DC 20032, 202-909-2525.

**Annual Review of Philosophy, Conceptual Framework, and Outcomes**

The Annie Ruth Kelley ADN Program faculty at SCC accepts the responsibility to annually review and revise as necessary the statement of philosophy, outcomes, and organizing framework. Reviews and revisions by faculty address the current needs of both healthcare providers and consumers ensuring close congruency with the college mission, goals, and value statements. Faculty meetings reflect these discussions, which are available for review by evaluators of the program.
General Purpose of the ADN Student Handbook
The purpose of this handbook is to provide the ADN student with relevant information regarding SCC’s ADN Program. Policies and procedures specific to the ADN program are found within this section of the handbook. These policies and procedures have been developed by the nursing faculty and are updated periodically. Students have access to the Handbook via all NUR courses and via the website. Immediate revisions are conveyed to students via email.

Accountability
The student shall read the ADN Student Handbook, the course syllabi, and other official college publications. Students will not be excused from any regulation, requirement or deadline set forth in these publications.

Program Student Learning Outcomes
Upon completion of the Associate Degree Nursing Program, the graduate will upon licensure:

1. Establish safe, professional nursing behaviors including accountability for entry-level nursing competence as demonstrated by a passing score* on the NCLEX-RN licensure exam as delineated by the rules and regulations of the North Carolina Board of Nursing.
   *NCLEX-RN does not award numerical scores. Reports only include pass or fail.

2. Communicate with individuals, significant support person(s), and members of the interdisciplinary healthcare team as demonstrated by a grade of “pass” on the summative clinical evaluation tool described under the nursing domain.

3. Formulate holistic assessments to identify the needs of the individual in order to provide culturally competent client-centered care as demonstrated by a grade of “satisfactory” on the complex patient comprehensive assessment on the clinical prep tool.

4. Utilize healthcare informatics to apply research to practice for evidence-based practice, clinical judgments, and management decisions as demonstrated by a score of “satisfactory” on the evidence-based practice project completed in the capstone course.

5. Create nursing plans of care for clients across the lifespan as demonstrated by cognitive proficiency on the nursing caremap in the clinical setting.

6. Incorporate teaching and learning principles into nursing practice as demonstrated by completing a capstone teaching project with a passing score of 80% or above.

7. Manage healthcare for clients by utilizing cost-effective nursing strategies, quality improvement processes, and legal/ethical awareness to promote quality outcomes as demonstrated by a “passing” graded clinical performance to prove cognitive and behavioral proficiency of the healthcare domain as described on the clinical summary.

Course Student Learning Outcomes
Course student learning outcomes are found within course syllabi.
## General Education Student Learning Outcomes

<table>
<thead>
<tr>
<th>General Education Learning Outcomes</th>
<th>Course Measurement (Generally Speaking, Specific measurements found within NUR courses)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Demonstrate effective communication skills.</td>
<td>1. The student demonstrates effective communication skills through managing the care of the client with multidisciplinary team members in the clinical setting, as well as among classmates through oral presentations.</td>
</tr>
<tr>
<td>2. Apply basic mathematical concepts and skills.</td>
<td>2. The student applies basic mathematical concepts and skills in pharmacological application in the classroom and clinical setting.</td>
</tr>
<tr>
<td>3. Demonstrate basic computer skills necessary to function in a technological world.</td>
<td>3. The student demonstrates basic computer skills through online charting in the clinical setting, use of e-books, use of virtual simulation scenarios, and through the use of Canvas for online instruction.</td>
</tr>
<tr>
<td>4. Demonstrate problem-solving skills through critical thinking and reasoning skills.</td>
<td>4. The student demonstrates problem-solving and critical thinking skills in the basic and complex care of clients. These skills are further evaluated through common techniques within the curriculum (i.e. Simulation, NCLEX-RN style questioning).</td>

THE ENVIRONMENT

Last updated: 5/15/19; 4/7/2020
Anchors
Anchors are ideas that are in courses and cover the span of the ADN curriculum. Anchors agreed upon by nursing faculty included the idea of assessment, communication, (critical) thinking, and safety. This identification of curriculum anchors fostered the development of the acronym ACT Safe. Use of this acronym facilitates nursing education by properly assessing clients and families, communicating with clients and other members of the healthcare team, critically analyzing information obtained through the assessment to properly implement nursing interventions and evaluate their effectiveness, all the while maintaining a safe environment for the client.
The nursing department organization is linear on paper; however, nursing faculty collaborate in order to meet the needs of the program and students. All nursing faculty report to the Nursing Program Director. In the absence of the Program Director, the Associate Director oversees processes.

First level in the general track includes a course coordinator, clinical coordinator, and lab/sim coordinator. Second level includes a course coordinator and clinical coordinator. The second level clinical coordinator works with the Sim/Lab Coordinator to meet student learning objectives.

Part-time clinical faculty report directly to their respective clinical coordinator.

Students are expected to utilize a chain-of-command approach in communications with nursing faculty.
STUDENT POLICIES

1. Appearance
   A. Clinical Sites
      1. The ADN student uniform includes a turquoise top with embroidered emblem and
         black pants or black knee-length skirt. Black shirts without adornment may be worn
         under uniform top. Clean, closed, non-porous leather, black shoes, and plain black
         socks with pants or black hose/tights with knee-length skirt.
      2. Anything worn outside of the above described uniform is considered a breach of
         student policy and the student shall be sent home. Head coverings are not allowed,
         unless for religious purposes which must be approved by the Clinical Coordinator.
      3. A watch with a second hand, bandage scissors, stethoscope, ECG calipers and
         penlight are needed. Note: ECG calipers and penlight are part of the nursing bag
         purchased through the uniform vendor.
      4. A clinical notebook will be necessary to create and maintain throughout the program
         to show clinical progression. Any ring-binder will work and will be purchased by the
         student at any retailer of his/her choice.
      5. There will be times when you may want to wear a lab/warm up coat. Lab/warm up
         coats should be black, clean, wrinkle free fabrics, not of a sweatshirt material. The
         lab/warm up coat must have the SCC ADN embroidered emblem.
      6. No cell phones are allowed in patient care areas.
      7. Some clinical agencies may have additional requirements regarding dress,
         appearance, etc. which shall be upheld by the visiting students. Students must abide
         by all clinical and facility specific policies.

   Anyone not complying with these policies related to appearance will be sent home. This
   will be considered a clinical absence (see Clinical Attendance policy).

2. Conduct
   Conduct viewed as disruptive will not be tolerated within class or clinical – See Student Code
   of Conduct Policy located in the policy section of www.stanly.edu.

   A. Classroom:
      1. Drinks in the classroom must have a screw-top lid.
      2. No food or drink is allowed into the nursing lab or Simulation Hospital at any time.

   B. Clinical:
      1. Knock before entering closed doors in the hospital. Wait for permission to enter
         before entering.
      2. Smoking will not be allowed in clinical areas.
      3. Breaks and lunch will be arranged by the clinical instructor.
      4. Information regarding clients and fellow students is strictly confidential and can only
         be discussed in a private area for the purpose of learning. Any break of this rule of
         confidentiality will result in remediation and possible dismissal from the program and
         possible prosecution (See HIPAA regulations). The student is required to sign a
         confidentiality form stating that he/she understands and will abide by the policy.
      5. Obscene or profane language will not be tolerated.
      6. Students must remain within the clinical facility during meals and breaks.
7. Students must notify the instructor and primary nurse before leaving the floor. Failure to comply may result in an unsafe incident related to abandonment of client.

3. Performance
   A. Performance Standards for Students in the clinical and classroom settings:
      1. Critical Thinking:
         Nursing students shall possess critical thinking ability sufficient for clinical judgment. Example: Students must be able to identify cause-effect relationships in clinical situations; develop or participate in development of nursing care plans.
      2. Ethical Behavior and Cultural Competence:
         Nursing students will provide services with respect for human dignity and the uniqueness of the client unrestricted by consideration of social or economic status, personal attributes, or the nature of health problems. Example: Students will care for clients assigned regardless of race, religion, or diagnosis.
      3. Legal Behavior:
         Nursing students will provide care within the scope of practice as stated in the NC Nursing Practice Act. Example: Students in the nursing program will learn to assess the patient’s physical and mental health and report and document according to those findings.
      4. Interpersonal Skills:
         Nursing students shall possess interpersonal abilities sufficient to interact with individuals, families, groups, etc. from a variety of psychosocial cultural backgrounds. Example: Students shall establish rapport with clients and health care team members.
      5. Communication Skills:
         Nursing students shall possess communication abilities sufficient for verbal and nonverbal interaction with others. Example: Students shall be able to explain treatment procedures to clients/family, document client responses, and report to others responsible in client care.
      6. Mobility:
         Nursing students shall possess physical abilities sufficient to move from room to room and maneuver in small spaces, stand and walk for extensive periods of time. Example: Students will be able to move around in client’s room and administer CPR.
      7. Motor Skills:
         Nursing students shall possess gross and fine motor skills sufficient to provide safe and effective nursing care. Example: Students shall be able to calibrate equipment, position clients, administer injections, insert catheters, etc.
      8. Hearing Skills:
         Nursing students shall possess auditory ability sufficient to monitor health needs and collect data. Example: Students shall be able to hear alarms, listen to heart and breath sounds, and hear a cry for help.
      9. Visual Skills:
         Nursing students shall possess visual ability sufficient for observation and data collection. Example: Students shall be able to observe color of skin and read scale on a syringe.
     10. Tactile Skills:
         Nursing students shall possess tactile ability sufficient for data collection. Example: Students shall be able to detect pulsation and feel skin temperature.
11. **Weight-Bearing:**
Nursing students shall possess the ability to lift and manipulate/move at least 40-50 pounds. Example: Students shall be able to move equipment and position patients.

B. **Emotional Health**
The emotional health of each student is evaluated by a primary care provider using the required medical form completed prior to starting the program. When emotional conditions prevent satisfactory classroom or safe clinical performance, the instructor will dismiss the student from class or clinical. The Program Director, in collaboration with the Associate VP of the School of Health Sciences & Public Services and the Executive Vice President, can immediately dismiss the student from the ADN program. (Reference SCC Catalog – Student Code of Conduct)

C. **General performance related to clinical settings and classroom/lab settings:**
1. Instructors will not be responsible for missed classes or lost materials by students. It is the student’s responsibility to seek additional help as needed.
2. Students are expected to complete clinical assignments within the allotted time.
3. Students are expected to immediately notify the instructor and/or team leader changes in client’s condition requiring immediate intervention.
4. Evaluations regarding student clinical performance will be documented with each clinical experience using a weekly clinical summary. Both student and instructor will have an opportunity to record comments and to communicate to each other both effective and ineffective behaviors on the weekly clinical summary. Based on the documentation within this record, a final grade of pass or fail will be assigned on the end of semester clinical summary. The instructor is to evaluate the student’s clinical performance, identify strengths and weaknesses and make remediation plans as necessary. See Clinical Evaluation policy.
5. Students will be held accountable for retaining and refining skills and knowledge obtained in previous courses as they proceed through the program. Failure to do so will result in remediation, and possible dismissal from the program if remediation is not satisfactory.
6. All medications are to be reviewed by an instructor prior to administration.

**NOTE:** Any medication requiring signed consents prior to giving, the RN will get the consent signed and then the student can give the medication with the RN.

**Drugs that are NOT given by nursing students:**

a. IV antineoplastic medications (Chemotherapeutics)
b. Whole blood and blood products, including packed cells, plasma, platelets, and Rhogam
c. Radioactive substances
d. Medications during CPR
e. Thrombolytics (i.e. TPA)
f. “Yellow Bin” medications
4. **Progression and Dismissal Policies:**

A. For the student to progress in the nursing program, a grade of C or higher must be achieved for all courses listed within the nursing program of study. All course work taken at SCC must have a 2.0 GPA or higher.

Students earning less than a C in a nursing course and/or any other course within the nursing program of study will be withdrawn from the nursing program automatically. If a student receives below a C (below 80) in the theory component or fails in the clinical component of nursing courses a grade of F will be submitted for the overall grade for the course.

Please be aware that Satisfactory and Unsatisfactory assignments of each NUR course are linked to the end-of-semester clinical summary, which is different from an unsatisfactory issued on the weekly clinical summary. An unsatisfactory evaluation on the end-of-semester clinical summary will result in a failing grade for the course.

Students taking general education courses from another college will be required to present proof of course completion to progress. Students will not be allowed to register without the transcript information. Progression depends on maintaining general education course grades and GPA.

Progression throughout NUR 112 and 212: NUR 117 is a 16-week course for the general track. Students withdrawing from this course must withdraw from NUR 112/212 at the same time.

The grading scale for all NUR courses is as follows:
- A = 94 - 100
- B = 87 - 93
- C = 80 - 86
- F = a score of less than 80 in theory or fails the clinical evaluation

**ROUNDING POLICY:** All grades are calculated to the nearest hundredth throughout the entire semester. The final course grade is calculated to the nearest whole number with 0.49 or less rounded down to the nearest whole number, and 0.5 or more rounded up to the nearest whole number.

B. Students are assigned Success Coaches for advising related to the nursing curriculum. Success Coaches will evaluate student progress within the courses. If problems arise at any other time during the course, the student is responsible for scheduling an appointment with a nursing Success Coach.

C. In the event that a student’s physical or mental health interferes with the student’s academic and/or clinical performance, the nursing faculty may require the student to submit written verification of current health from an appropriate health care provider (i.e., physician, nurse practitioner, psychiatrist, or psychologist). Upon review of the professional statement of health submitted by the student, the Program Director of Nursing, the Associate Vice President of the School of Health Sciences & Public Services and the Dean of Student Outreach & Support will determine if the student may continue in the program. The Dean of Student Outreach & Support will notify the student in writing of the decision.
D. In the event that a student’s behavior is not consistent with sound nursing practices and/or safety essential to nursing, the faculty, clinical facilitators, or the Program Director of Nursing have the authority to temporarily remove the student from the clinical, class, or lab setting immediately with the loss of clinical hours if related to clinical removal. If the faculty or the Program Director determines that the student has demonstrated behavior conflicting with sound medical care practices or safety, recommendation will be made to withdraw the student from the class or program to the Associate Vice President of Health Sciences & Public Services. The Associate Vice President of Health Sciences & Public Services will notify the student in writing of this recommendation.

E. Students unable to complete the clinical portion of his or her training will be unable to progress in the program.

5. Infectious Disease Policy:
Because of the nature of the health care profession, students participating in required clinical education experiences will find themselves at risk for exposure to infectious diseases. The risk cannot be eliminated. However, it can be minimized by careful and consistent technique and the implementation of standard precautions in the care of all health care consumers. Students will be instructed in standard precautions. “Standard precautions” (i.e., gloves and safety glasses, gowns, handwashing and masks where appropriate) will be implemented in the care of all clients. Because of the nature of the student-client relationship, the client must also be protected from a student caregiver who may transmit infectious diseases.

The following information deals with the SCC nursing program policy for handling infectious disease:
A. Assignment of HIV positive clients to students:
   1. Known HIV positive clients will not be assigned to first year nursing students during NUR 111, NUR 112 or NUR 212. Standard precautions shall be implemented for all clients.
   2. Immunosuppressed students or students who have active infections will not be assigned as the caregiver for diagnosed AIDS clients.

B. Exposure to blood or other body fluids:
   1. Exposure includes percutaneous injury with a contaminated sharp object (needle, lancet, broken slide, etc.) and exposure of mucous membranes or open skin lesions to blood or body fluid of clients.
   2. It will be the student’s responsibility to notify his/her clinical instructor immediately when an incident has occurred. The clinical instructor will notify the clinical coordinator and follow the exposure policies of the clinical agency and the college. (see student occupational exposure incident report - appendix VI in Health Sciences Student Handbook)
   3. Students will be responsible for health care expenses incurred in treatment following exposure to infectious diseases. It is advised that all students carry health insurance.

6. Immunizations and Certifications:
A. Students must provide documentation as free from tuberculin infection on the physical form prior to entry into the program and clinical experience. A 2-step PPD skin test is required initially with a single step PPD each year thereafter. A QuantiFERON®-TB
Gold blood test for mycobacterium may be used if available. It is the student’s responsibility to maintain verification of freedom from tuberculin infection on a yearly basis while enrolled in the ADN program. Failure to maintain this may jeopardize the student’s ability to participate in clinical activities.

B. Students are required to present verification of two MMR vaccines or a lab report indicating immunity.

C. The student must maintain current Healthcare Provider CPR certification by the American Heart Association, which includes care of the adult, child, infant and AED.

D. Students are required to receive vaccinations for Hepatitis B at their own expense or sign a declaration of denial. Some clinical affiliates require vaccinations of students. (See Appendix v and vi)

E. Students, besides incoming LPN-ADN students, are required to have NAI certification and be listed on the NC Department of Health and Human Services Healthcare Personnel Registry prior to beginning nursing classes. Applicants must submit a certificate of satisfactory completion from a DHSR (Division of Health Service Regulation) approved Nurse Assistant, Level I program, and current unrestricted certification in Nurse Assistant, Level I as listed on the NC Nurse Aid registry (http://www.ncnar.org). If an applicant is currently employed as a Nurse Assistant level I but cannot produce a certificate from a DHSR (Division of Health Service Regulation) approved Nurse Assistant, Level I program, documentation from the applicants current employer that the applicant has spent at least 240 hours providing patient care at the bedside may be submitted for consideration.

Upon successful completion of NUR 112, students will be offered the option to obtain CNAII certification through the NC Board of Nursing. In order to acquire this certification, the student must hold an active CNAI certification and maintain it for CNAII certification.

F. Some clinical agencies require flu vaccines of students. Although this is not listed on the CastleBranch to-do list at the beginning of the program (since it is not available then), this is often a request of clinical sites. If refused by the student, the clinical facility policy must be adhered to by the student.

G. A Tdap vaccine is required. It must be a Tdap, not a Td booster, within the last 10 years.

H. Varicella vaccines or lab reference indicating immunity is required.

I. Paperwork (medical form, immunizations/titers, clinical site required paperwork, CPR certification, background checks, urine drug screening and Handbook paperwork) are housed in electronic format that is username and password protected using the vendor CastleBranch. Information is shared with clinical sites using this online format after student consent is obtained.

7. Fees:

Tuition for the nursing program is based on the number of credit hours taken within a given semester. The following link explains tuition and other charges in detail. Refer to the website for tuition costs: https://www.stanly.edu/future-students/college-catalog/costs/tuition

Required textbooks vary in price from year to year and between the two tracks (general track and LPN-ADN track). Most books, required computer testing, and supplies are purchased at the beginning of the program (approximately $2000 – general track; $500 – LPN-ADN track). Nursing kit and uniforms are approximately $300. Miscellaneous (i.e. student IDs, immunizations, drug screening and background check) are approximately $300. In the
capstone course, NUR 213 or NUR 223, a fee for Hurst review services will apply at the time of registration.

8. Testing:
   A. The ADN program utilizes scantron answer sheets for testing purposes. When scantrons are in use, grades will be determined through that evaluation tool only. Hard copies or scrap paper will not be used for grading purposes.

   B. Other computer-based software applications are utilized within SCC nursing program (i.e. PrepU, VSim, Docucare). These are at the cost to the student. PrepU uses adaptive NCLEX-style questioning to simulate the NCLEX-RN. VSim is a computerized virtual patient simulation where simulations are carried out based on the National League of Nursing Scenarios. Docucare provides a computerized documentation system to emulate technology common in the clinical setting. StatRef! And Board Vitals, free services with varying resources, are offered by the NC Community College System and are accessible through SCC’s library resources.

   C. Testing Procedures:
      1. Students must be on time for scheduled exams. Refer to attendance for scheduled exams below.
      2. A proctor will be available during testing periods to answer questions regarding typographical errors. No other questions will be answered during a test.
      3. Before the test, all items will be stored at the front of the classroom except for pencils, clean scrap paper when necessary, and a calculator issued by the proctor.
      4. Students should review their scantron test for completeness before handing it in. Once scantrons are handed in, they will not be returned. In the event the student needs to use the bathroom, a proctor will escort the student.
      5. All test papers must be returned after the testing period. Tests are not allowed to leave the classroom.
      6. Students are not allowed to wear hats into the classroom on scheduled test days.
      7. Faculty believes learning should be on-going and all-inclusive. Therefore, faculty reserve the right to include content from previous semesters on tests.
      8. Canvas resources will be hidden from viewing at the beginning of each testing period. This includes access to notes, videos, lectures, etc. for the material being tested on. Material will be re-opened after test review or after all tests completed.
      9. Smart watches are not allowed to be worn during tests.
      10. Other testing procedures are specific to nursing courses. Any additional testing procedures are found within nursing course syllabi.

9. Attendance:
   A. Scheduled Exams:
      1. Absence for scheduled exam
         a. In the event a student needs to be absent for a scheduled exam, the student will notify the instructor prior to the testing period by phone or email. The student will take the alternate exam on a day at the instructor’s discretion or receive a zero for that exam. Time and date of the exam are to be arranged by the instructor and arranged by the student with testing center hours of operation. Students are
expected to be on their honor not to discuss the test with classmates before taking it. Instructors reserve the right to use a comparable test in a different format.

b. Failure to notify the instructor of your inability to take the scheduled exam prior to the scheduled test time will result in a zero for that exam.

2. Tardy for scheduled exam
   a. Students tardy on the day of the exam will not be allowed to take the test and will have to take a comparable alternate test at a date and time determined by the instructor.
   b. Students tardy for alternate tests will be given a zero for that exam.

B. Lab Attendance:
   Lab attendance is required as it prepares each student for clinical experience. Failure to attend lab may result in lack of preparation for clinical. Skills must be satisfactorily completed in lab prior to being performed in clinical. Students who do not meet this requirement will be sent home from clinical. This will constitute an absence and the clinical absence policy will be enforced.
   Missed labs must be re-scheduled with the lab instructor and made up within one week of the scheduled lab. It is the student’s responsibility to reschedule. Failure to make up a lab within the one-week period will result in the inability to attend clinical due to lack of preparation.
   All procedures must be performed according to the current textbook being utilized.
   Students are allowed two opportunities to correctly demonstrate a skill in lab. If the student does not demonstrate the skill successfully after two opportunities, he/she will be withdrawn from the nursing program. A student will only be allowed to perform a skill during a clinical experience if the skill has been satisfactorily completed in the lab. The student is responsible for maintaining an updated skills check-off sheet throughout the course of the program.
   Some lab assignments are self-paced modules on Canvas. Participation in all lab modules is expected and material from modules may be used on tests. Students are responsible for completing online modules and communicating with other students/instructors regarding module content using discussion boards on Canvas.

C. Clinical Attendance: Some clinical experiences involve direct patient care in acute and non-acute care settings. Isolated clinical learning experiences involve one or two days in a clinical setting to meet course objectives (i.e. ICU, OR, school, virtual care). Students absent from an isolated clinical learning experience will still be required to meet the objectives of that clinical experience through alternative means to be determined by the clinical coordinator.

Students are expected to attend all clinical experiences.
When a student is going to be absent from clinical practice, she/he must notify the instructor. It is the student’s responsibility to call and talk with the instructor in person. If the student is unable to reach an instructor immediately, a message should be left with a staff member in the appropriate clinical department.
Students who miss more than 14 hours of the clinical experience in a semester will not progress and will be dropped from the program at that point.
Any student who leaves early from a clinical rotation will forfeit the hours he/she accumulated during that day. The only acceptable reasons for students leaving the clinical
area early are personal sickness (see F below) or an emergency. Students must obtain approval from their instructor to leave the clinical area prior to the scheduled departure time.

Any student who works any night shift prior to a clinical day will be asked to leave the clinical area unit and will be given an absence for the clinical day involved. Sleep impairment on the part of the student nurse is a detriment to client safety.

If a student is at any time found to be unprepared, he/she will be told by the clinical instructor to leave the clinical area. This will constitute a clinical absence.

If the student has not had any clinical absences in a semester, the student will receive one point added to the final grade. Points will only be added if the student has achieved a passing grade in theory and clinical. (See Points Policy.)

D. Clinical Tardiness:
Tardy is defined as arriving at the clinical area at a time later than the scheduled meeting time. If the student arrives tardy to the clinical site, he/she will be sent home, and this will be considered a clinical absence.

E. Messages:
1. Because of the limitation of the switchboard, telephone messages, not of an emergency nature, cannot be handled by the school. If a family member needs to contact, you in the event of an emergency have the caller channel the call through Student Development. Student Development will decide the appropriate course of action.
2. Telephones in the instructor offices are not to be used for personal use.
3. Identical limitations apply to the hospital situation. Callers are to direct their messages to the appropriate instructor rather than to the student. Instructors will be responsible for notifying the students of messages. No visitors are allowed in the clinical area.
4. Cellular phones, Ipods, smart watches, etc. are not to be brought in the clinical area.

F. Illness during Clinical Attendance:
If a student becomes ill during clinical practice, the student should notify his/her instructor and proceed as directed by the instructor. Leaving the clinical setting due to personal illness forfeits any time spent that day and counts towards your total time that can be missed. Students will not be treated on the clinical unit. All costs involved in medical treatment are the responsibility of the individual student.

10. Clinical Evaluation:
A clinical grade of “Pass” or “Fail” will be earned by the end of the semester. A “Pass” grade indicates that the student has met all clinical objectives as outlined in the End-of-Semester Clinical Evaluation Tool for each course. The end-of-semester clinical evaluation tool is supported by the weekly clinical summary. A clinical grade of “Fail” will result in failure to progress.

A. Remedial Skill Form:
A student may receive a remedial clinical work form if he/she does not properly demonstrate a skill or knowledge in the clinical area. The student must review this skill
in the appropriate textbook, practice the skill in the lab, and demonstrate it to the clinical coordinator within one week prior to returning to the clinical site. See Appendix ii.

B. Unsafe Clinical Incident:
An unsafe incident is the occurrence of a situation in a clinical setting in which the behavior of a student did endanger or potentially endanger the patient/student/faculty’s welfare. Clinical settings include nursing labs, simulation lab, and off-campus clinical affiliated sites. It may also be defined as any unprofessional or inappropriate behavior as determined by the nursing faculty. Such an incident is one which could have been avoided by application of learning objectives previously covered. (See Appendix iii.) An unsafe incident occurrence will result in immediate dismissal from the clinical setting and placement on clinical probation (see C below). The faculty involved must report the incident to the Clinical Coordinator and the Program Director along with written documentation. The Program Director will then call a meeting of the ADN faculty to review and evaluate the situation. The student will be given the opportunity to meet with the faculty as a part of the review process. The student will not be permitted to return to the clinical setting until resolution. If it is determined by the nursing faculty that the student has demonstrated behavior which conflicts with sound nursing practice or safety, the student will be withdrawn from the course and dismissed from the ADN program by the Program Director, in collaboration with the Dean of Student Outreach & Support and the Associate VP of the School of Health Sciences & Public Services. Students so removed will be referred to the Dean of Student Outreach & Support for further investigation and/or dismissal from the college. Students, who wish to appeal the faculty decision, must follow the grievance policy.

C. Clinical Remediation/Probation:
Clinical probation formally notifies the student of clinical practice concerns which must be addressed for the student to satisfy the clinical component of the course. A student may receive an “Unsatisfactory” evaluation in clinical for reasons which include, but are not limited to, the following:
- less than satisfactory clinical performance
- unsatisfactory written assignments
- medication errors and/or performing any procedure or giving any medication without securing appropriate supervision designated by the instructor
- HIPAA violation
- late assignments
- Lack of professional behavior in representing the program and college

A student who earns 2 “U” evaluations during the semester will automatically be placed on clinical probation, and remediation will be instituted. Three “U” evaluations in a semester amount to dismissal from the program. An unsafe incident in the clinical area shall result in automatic clinical probation, if student is not dismissed from the program (see B above), and remediation will be instituted. Any clinical probation during the semester forfeits the clinical point available for attending all assigned clinical experiences. Remediation involves the student meeting with the Clinical Coordinator to determine a remediation plan. Any remedial work must be completed at a date determined by the Clinical Coordinator. There will be scheduled
advising throughout the probation period between the student and the Course Coordinator, Clinical Coordinator and/or Lab Coordinator. The student will be removed from clinical probation when satisfactory clinical performance is exhibited as evaluated by the clinical instructor and the clinical coordinator. See Appendix IV. Any additional “U” evaluation received during the clinical probation period or for not completing remediation as directed by the faculty, will constitute a Failing (F) grade for clinical. The student will be dropped from the program at that point and receive a failing grade for the semester in that nursing course. The student whose probationary period extends into the next semester will receive an Incomplete (I) grade and will have a specified date given by the course coordinator to complete the remediation or receive an “F” for the course. A student may be retained on clinical probation no more than twice while in the nursing program.

D. Assignments linked to end-of-semester clinical summary
Satisfactory and unsatisfactory assignments of NUR courses are linked to the end-of-semester clinical summary, which is different from an unsatisfactory issued on the weekly clinical summary. An unsatisfactory evaluation on the end-of-semester clinical summary will result in a failing grade for the course. An unsatisfactory grade on any non-clinical assignment listed in the evaluation portion of the course syllabus will also result in a failing grade for the course.

E. Simulation
Simulation activities in the Simulation Hospital and nursing lab at SCC include simulated clinical scenarios, simulated task training, simulated patient scenarios, debriefings, and/or discussions. In order to preserve the function and quality of the equipment and to enable future students to benefit from the Simulation Hospital at SCC, students will be expected to follow the rules and regulations that govern the lab each semester. In addition, all simulation activities are considered confidential, whether electronic, written, verbal, observed or overheard, and may not be disclosed or discussed outside of the simulation environment. Any participants (e.g., students, learners, educators, instructors, faculty, staff or observers) in simulation activities are expected to behave in a professional manner and maintain confidentiality. Any sharing, posting to social media, discussion, recording, reproducing, revealing or disclosure of simulation activities or performance is a violation of policy and may be grounds for disciplinary and/or legal action. Students will be asked to sign a confidentiality agreement at the start of each semester and are obligated to report any violations of confidentiality to the simulation faculty member. Cell phones and smart watches must be turned off in the Simulation Hospital.

F. Clinical Sites
Students are not guaranteed certain shifts or days for clinical assignment. Assignment is based on site availability and may include days, evenings, nights, and any day of the week, including weekends. Clinical sites specific to the course learning outcomes can be found within each course syllabus.

G. Clinical progression in NUR 213:
Students must be passing NUR 213 with a score of “80” or above after taking the Mid Term Exam. Failure to do so will result in the student being unable to participate in the
clinical component of NUR 213 and, consequently, being dropped from the ADN program.

H. Students wishing at any time to appeal a decision made by the Clinical Coordinator must first discuss it with the Clinical Coordinator and Course Coordinator. If there is no resolve to the issue, then clinical appeals follow the grievance policy as outlined in the college policies.

11. Learning Management System (LMS) policy:
Students use Canvas as the LMS, and as the portal to communicate with their peers and instructors. Internet Etiquette, Netiquette, is expected to be exercised by students and faculty using Canvas to post discussions. This is listed as a reference in all Canvas courses within the nursing program.

12. Self-service:
Students will be able to get their grades only through Self-service. In addition, SCC will use the student email accounts for correspondence to the student. It is the student’s responsibility to check their school email account for important information. Access to Self-service and Gmail accounts is located on the Student Resource page from www.stanly.edu.

13. Online Learning Management System Statement:
A component of the online class content is streaming video presented via Canvas. This technology is distributed based on current standards as established by Microsoft. Students have the responsibility to make sure the equipment they will use to complete this online class is configured to receive this streaming video. While the SCC HelpDesk at DLHelpDesk@stanly.edu will work with each student to troubleshoot connection problems, SCC is not responsible for the student’s home computer setup. Students who have difficulty viewing the online content of the course are advised to attend the seated class.

14. Online Learning Management System Video Content and Access:
Class videos are generated for the use of all nursing students; however, all students are expected to physically attend class. The inability to view the video content on a home computer does not relieve the student’s responsibility of meeting the requirements of the class. The videos are not available in a downloadable file format. No efforts should be made to circumvent the security protocols. Please refer to the Student Computer and Network Use Policy of the college. The policy is accessible through www.stanly.edu.

15. Points Policy:

A. Test Review:
Students have the opportunity to participate in a group test review when offered by the instructor. Group tests are at the discretion of the instructor. Students testing with the class can re-take the same test with a group of classmates. This is voluntary. Students in each group will submit one answer sheet. Those groups which score an ‘A’ on the re-take will have one point added to the test score of every person within the group. This is done in order to foster critical thinking as questions are debated within groups.

B. Attendance at faculty meetings:
It is vital to the program for nursing faculty to have input from students regarding program issues. ADN club officers will be notified regarding upcoming faculty meetings. If the ADN club officers are not able to attend a meeting, a substitute class representative may attend. If the cohort has a representative present at every faculty meeting for the semester, each student in the class with a final semester grade of 80 or greater will receive the appropriate points listed below added to the final semester grade.

C. Participation in ADN Club Activities:
The faculty recognizes that the program is challenging and that many nursing students have families, work, and other responsibilities outside of college. However, because community involvement is an important factor in the development of a professional nurse, each student with a final semester grade of 80 or greater will receive the appropriate points listed below added to the final semester grade for meeting ADN club participation guidelines. ADN club participation guidelines are established by the club members with the club advisor(s).

D. Clinical Attendance:
Competencies within the nursing program cannot be accomplished without clinical attendance. Because clinical hours are limited and many experiences are unique to a specific semester, attendance is considered paramount. See policies on clinical attendance previously discussed. Each student with a final semester grade of 80 or greater who has perfect clinical attendance and has not been on clinical probation during the semester will receive the appropriate points listed below added to the final semester grade.

16. ADA Statement:
ADA Statement: If you have a disability that may affect your academic performance and are seeking accommodations, it is your responsibility to inform the ADA services office located in SB220. You may contact Megan Brehun at (704) 991-0161 or mbrehun6994@stanly.edu if you have any questions concerning disability services. You may also visit https://www.stanly.edu/future-students/college-catalog/student-support-services/disability-services-ada to learn more about ADA services at Stanly Community College. It is important to request accommodations early enough to give the ADA services office adequate time to consider your request and recommend reasonable accommodations. Students are encouraged to initiate the request process 30 days prior to the beginning of a semester or class. Accommodations are not retroactive and can only become active after all required documents
are submitted. Instructors will provide necessary accommodations based solely on the recommendations of the ADA services office.

17. Religious Observance Policy:
SCC recognizes the existence of diversity in religious beliefs. Out of respect for individual religious convictions, the College will allow two excused days of absences per academic year. At least two weeks prior to the leave the student must submit in writing to all his/her instructors for the term what day(s) he/she requests as a religious observance. The student will be given the opportunity to make up any class work, clinical/co-op hours, or tests missed during the excused day(s).
For the Nursing Program, the student must submit in writing to all nursing instructors for the term what day(s) he/she requests as a religious observance by the second day of class. Changes to the schedule may be made at the instructor’s discretion.

18. Honesty:
All students are expected to be honest with faculty and staff in all situations related to clinical and academic activities. Students witnessing any dishonest activity must bring it to the attention of a faculty member. Resubmission of work completed for any previous course cannot be submitted for a future course assignment and will not be accepted.

19. Social Media Policy:
The Annie Ruth Kelley ADN Program defines social media to include online platforms such as professional or social networking, posting commentary or opinions and sharing pictures, audio, video, or other content which includes, but not limited to Facebook®, LinkedIn®, Snapchat®, YouTube™, Twitter™, blogs, message boards, professional forums and chat rooms. The use of social media bearing any SCC name or affiliation are only for educational purposes. Students may use social media to enhance learning, inform the public about college activities and developments, and shall allow participants to share freely without cyberbullying.
Students shall maintain confidentiality of patient information, as well as conduct themselves professionally at all times. At no time should a student make commentary, derogatory or otherwise, regarding patients, families, clinical staff, classmates, faculty or SCC in social media. Students are reminded that what they do outside of the practice setting may affect how they are perceived professionally. Nursing faculty support the guidelines for use of social media provided by the National Council of State Boards of Nursing (NCSBN), the American Nurse Association (ANA), and the NC Board of Nursing white paper. Evidence that a student violates this policy is considered grounds for disciplinary and possibly legal action, resulting in possible dismissal from the nursing program. Students are not to contact instructors through social media while in the program. Students should direct all communication outside of class through the correct Canvas course or the instructor’s SCC email. Instructors will not contact currently enrolled students through social media.
https://www.ncsbn.org/NCSBN_SocialMedia.pdf
http://www.nursingworld.org/FunctionalMenuCategories/AboutANA/Social-Media
20. Miscellaneous:
A. Nursing Club: A nursing organization including all cohorts of nursing students has been established. All students are encouraged to participate in this organization. Election of class officers is developed in order to establish a direct route of communication between faculty and students. The ADN student organization will hold periodic meetings. The purpose of these meetings will be to provide support and cohesiveness among members of all cohorts and to encourage professional behaviors for ADN students. Students shall hold club meetings on their own time and should not conflict with SGA activities.

B. ADN Handbook Statement: Students are expected to retain a copy of the General Health Sciences and Nursing Department Student Handbooks for the duration of the program. On the first day of class each semester, students will be asked to sign a statement to the effect that they have received and understand the content and the responsibilities imposed by the Handbook. The instructors will consistently abide by these policies and expect students to do the same. Any updates to the handbooks will be sent electronically to students through Canvas email at the time of the update. Students are further bound to abide by hospital policies/requirements presented during facility orientation and to all SCC policies applicable to the ADN student.

C. If the student is employed by a facility which is used as a clinical facility by the SCC Nursing Department, the student should be aware that the nature of those responsibilities should in no way be related to his/her responsibilities as a student and the student uniform may never be worn while functioning in roles outside of school clinical assignments. The employing facility takes full responsibility for the student employee’s action while working.

D. All nursing students must carry malpractice liability insurance. Verification of insurance coverage must be uploaded to the online tracking system used by SCC, CastleBranch, before the student will be allowed to attend the first clinical experience. The student must purchase the liability insurance when tuition is paid each fall and spring semester.

E. NCLEX-RN Review: Students are encouraged to attend a seated or online NCLEX-RN review prior to taking the NCLEX-RN. Information will be distributed to all second-year students.

F. Citing Sources: Students are expected to use current reference material on all assignments. Sources should be no more than 5 years old. Historical data is the one exception. APA format is used for all nursing courses.

21. Associate Degree Nursing Readmission/Advance Placement Admissions Policy

A. Generic Track

Students will be permitted to reenter the nursing program no more than once.

General information for any student seeking advanced standing:

Associate Degree Nursing Advanced Standing Policy:
Students seeking readmission to Stanly Community Colleges Associate Degree Nursing program must apply for readmission to the SCC Admissions Office and satisfy the admission requirements.

Students will be permitted to reenter the nursing program only once.

General information for students seeking readmission:
Students seeking readmission, who were formerly enrolled in the ADN program at SCC and wish to reenter within two years of exiting the program, must reenter the semester immediately following their last successful NUR class. Example: If a student successfully completes NUR 112, then withdraws or fails, the student must reenter the nursing program at NUR 212.
Students who enter SCCs ADN program after having withdrawn from an ADN program more than two years earlier will restart the program as a new student if only admitted once previously.

Steps:
1. Students seeking advanced standing status must:
   • Contact the ADN Program Director
   • Complete an application as advanced standing for the term (Fall, Spring, Summer) and year of reentrance. Below is an example of the application screen with prompts.
   • All documents for admission must be turned into the ADN Program Director no later than 45 days prior to the first day of class.

2. Admissions will then determine if the required GPA of 2.5 in the required nursing program courses have been met. Students must hold a cumulative GPA of 2.0 for all courses previously taken at SCC.

3. Readmission to the nursing program will be on a space available basis, and in relation to TEAS Exam scores. For example, if there are 5 available spaces for 7 students, the 5 students with highest TEAS scores will be offered a seat.
4. Students wishing to reenter into SCC's ADN program must:
   (A) Successfully complete selected skills competencies administered by the SCC nursing department, and
   (B) Successfully complete a written competency exam covering all transferable NUR courses.

   A test breakdown of the written competency, a list of skills, any outstanding admission requirements, and instructions for scheduling the competency test will be emailed to the student by the ADN Program Director. Students will have one attempt to pass the competency exam and skills; otherwise, the student is ineligible for readmission to the Nursing program.

5. Additional general admission requirements for the ADN program must be fulfilled and include:
   - Completed physical exam (new)
   - Immunization updates
   - Criminal background check (new)
   - Drug screening (new)
   - CPR certification
   - CNA1 certification (listed on the NC Nurse Aide Registry)

   NOTE: Effective February 1, 2020 students from other nursing programs will need to start from the beginning of the program.

B. LPN-ADN Readmission Policy

Students seeking readmission or advanced placement SCC LPN-ADN program must apply for readmission to the SCC Admissions Office and satisfy the initial program admission requirements.

Students will be permitted to reenter the LPN-RN program no more than once.

General information for any LPN-ADN student seeking advanced standing:

Specifically, for students formerly enrolled in SCC’s LPN-ADN Program (A45110R) and are returning within 2 years:

   Students seeking readmission who were formerly enrolled in the LPN-ADN program at SCC and wish to reenter within two years of exiting the program, must reenter the semester immediately following their last successful NUR class (example: if a student successfully completes NUR 214 and subsequently withdraws, he/she must reenter the nursing program beginning the semester immediately following NUR 214). All nursing and general education courses required in the semesters preceding the intended point of reentry must be satisfactorily completed.

Specifically, for students formerly enrolled in SCC’s LPN-ADN Program and are returning after 2 years:
Students who enter SCCs LPN-ADN program after having withdrawn from the LPN-ADN program more than two years earlier will restart the program as a new student if only admitted once previously. NUR 117 (Pharmacology) will need to be repeated for credit to ensure safety of patient care.

**SCC LPN-ADN Program does not accept advanced placement students from other institutions.**

Steps:

1. Students seeking advanced standing status must first complete an application as advanced standing for the term (Fall, Spring) and year of reentrance. To qualify for admission as advanced standing, an applicant must submit a properly completed application for admission no later than 30 days preceding their intended start date.

2. After applying for the term and year of reentrance, admissions will determine if you meet the required GPA. Only those students with a GPA of 2.5 or higher in their major at the time of readmission to the ADN program will be considered for readmission. That GPA must stand up to the point of readmission if additional courses within the course of study are taken while not an actively enrolled nursing student. A student’s GPA in major will include only nursing and nursing related courses completed, either successfully or unsuccessfully, up to the point of readmission. Students must hold a cumulative GPA of 2.0 for all courses previously taken at SCC.

3. Readmission to the nursing program will be on a space available basis. Qualified applicants will be accepted in relation to their TEAS Exam score. TEAS scores accepted are those taken at SCC only and must be within 2 years of restarting the program.

4. Students wishing to return to the LPN-ADN program as advanced standing must (1) successfully complete a **written competency exam** covering all SCC NUR courses, and (2) successfully complete selected **skills competencies** administered by the LPN-ADN Clinical Coordinator. This is in addition to the general admission requirements for the ADN program. Students should contact the Associate Director of Nursing well in advance of the entering semester to arrange for a test breakdown of the written competency, a list of skills, any outstanding admission requirements, and instructions for scheduling the competency test. Students only have one attempt to successfully pass the competency exam and skills competencies. If a student does not successfully pass the exam or skills on the first attempt, the student is ineligible for re-entrance into the program.

5. A complete physical is required. A blank medical form will be mailed to the applicant upon acceptance for readmission. All required immunizations must be current for full acceptance into the ADN program.

6. Applicants applying for readmission / advanced standing are required to complete a new criminal background check and drug screen.
7. Current certification in AHA Healthcare Provider CPR must be submitted prior to re-enrollment.

8. If an otherwise qualified applicant is not accepted for readmission due to space limitations, he must submit another application for readmission if he wishes to be considered in a subsequent year.

Special Circumstances:
For applicants previously enrolled in SCC’s LPN-ADN program and who were withdrawn after having been unsuccessful in NUR 117 or NUR 221, the following will apply:

A. Student who fails or withdraws from NUR 117 (Pharmacology) and successfully completes NUR 221 (LPN-ADN Concepts I):
   1. May apply for advanced standing admission to the third semester of the LPN-ADN program and will follow the nursing guidelines for readmission including competency testing in NUR 214 and NUR 221.
   2. Must successfully complete NUR 117 (Pharmacology) prior to readmission

B. Student who fails or withdraws from NUR 221 (LPN-ADN Concepts I) and successfully completes NUR 117 (Pharmacology)
   1. Must apply for advanced standing to the second semester of the LPN-ADN program.
   2. Must successfully complete a competency exam for NUR 117 (Pharmacology) and NUR 214 prior to registering for NUR 221 (LPN-ADN Transition Concepts I).

C. Student who fails NUR 117 and NUR 221:
   1. Student must apply for advanced standing into NUR 221 and pass a competency for NUR 214 before retaking NUR 117 and NUR 221.

22. Criteria for Graduation:
To be eligible for graduation, a student must:
   1. Successfully pass all course requirements in major with an overall major grade point average of 2.00 or higher.
   2. Complete an application for graduation when registering for your last class.
   3. Earn at least one-fourth of the credits required for a degree, diploma, or certificate from Stanly Community College.
   4. Fulfill all financial obligations to the College.
   5. Graduation exercises are held on the dates published in the Academic Calendar. During graduation exercise candidates must be dressed in proper academic attire as determined by the President of the College.

23. Pinning:
The Pinning Ceremony is a dignified event sanctioned by the nursing faculty. It is a formal means for students to pay tribute to each other, family, friends, and faculty and a time for faculty to recognize students who have shown outstanding achievement and/or professional growth. The place, time, and date of Pinning are approved by the Program Director and the President of SCC. Guidelines are shared with the senior class by the nursing club advisor. Nursing faculty reserve the right to rescind this privilege at any time.
24. Licensure:
   a. The Program Director verifies a student with the North Carolina Board of Nursing as a candidate for the National Council Licensure Examination for Registered Nursing based on academic achievement and professional accountability following graduation.
   b. The North Carolina Board of Nursing may deny licensure to individuals convicted of a felony or any other crime involving moral turpitude.

STANLY COMMUNITY COLLEGE

REMEDIAL SKILLS FORM

Date Issued: ______________________

The student ___________________________ needs remedial work in the following skill ___________________________.

Remedial Objectives: The student will:

1. Review the appropriate text for the procedure in performing the skill.

2. Practice the skill in the lab.

3. Demonstrate the skill to an Instructor in the lab.

4. Achieve a satisfactory on the performance of the skill in the lab.

5. Return the lower portion of this remedial work slip to the CLINICAL INSTRUCTOR who issued it.

6. Complete the remedial objectives within ONE WEEK from the time it was issued.

Date Issued: ______________________

Date Completed: ______________________

This student ___________________________ has successfully completed all the remedial objectives for the following skill:

__________________________________________________________

__________________________________________________________

__________________________________________________________

__________________________________________________________

STANLY COMMUNITY COLLEGE

REPORT: UNSAFE INCIDENT IN THE CLINICAL SETTING

CRITICAL INCIDENT DEFINED:

An incident in the clinical setting involving a student in which:

A. The conduct and/or performance of the student did or potentially did endanger client welfare.

B. The incident could have been prevented by application of learning objectives previously covered.

DESCRIPTION OF INCIDENT (BY STAFF AND/OR INSTRUCTOR):

_________________________________________________________________________
_________________________________________________________________________
_________________________________________________________________________
_________________________________________________________________________

Date of Incident                               Location of Incident

Instructor Signature                        Date

PERCEPTION OF INCIDENT (BY THE STUDENT):

STANLY COMMUNITY COLLEGE
CLINICAL PROBATION REMEDIATION PLAN

A student may receive an “Unsatisfactory” evaluation in clinical for reasons which include, but are not limited to, the following:

- less than satisfactory clinical performance
- unsatisfactory written assignments
- medication errors and/or performing any procedure or giving any medication without securing appropriate supervision designated by the instructor.
- HIPAA violation
- late assignments
- lack of professional behavior

A student who earns 2 “U” evaluations during the semester will automatically be placed on clinical probation, and remediation will be instituted. The student will meet with the Course Coordinator or Clinical Coordinator, and remediation will be determined. Any remedial work must be completed at a date determined by the Clinical Coordinator. There will be scheduled advising throughout the probation period between the student and the Course Coordinator or Clinical Coordinator.

The student will be removed from clinical probation when satisfactory clinical performance is exhibited as evaluated by the clinical instructor and the Clinical Coordinator.

Any additional “U” evaluation – (during the current semester or during the probation period if it extends into the following semester) – received during clinical or for not completing remediation as directed by the faculty, will constitute a Failing (F) grade for clinical. The student will be dropped from the program at that point and receive a failing grade for the semester in that nursing course. The student whose probationary period extends into the next semester will receive an Incomplete (I) grade and will have a specified date given by the course coordinator to complete the remediation or receive an “F” for the course.

Terms of Clinical Probation and Clinical Remediation Plan for student:

_________________________________________________________________________________________
_________________________________________________________________________________________
_________________________________________________________________________________________

Timeline of unsatisfactory clinical events with dates:
_________________________________________________________________________________________
_________________________________________________________________________________________
_________________________________________________________________________________________

Clinical Remediation Plan and Due Date with time:
_________________________________________________________________________________________
_________________________________________________________________________________________
_________________________________________________________________________________________

Failure to successfully complete this clinical probation/remediation plan will result in not being able to return to the clinical site, inhibiting progression in the NUR program.

HEPATITIS B VACCINE – FACT SHEET

HEPATITIS: Hepatitis is a liver disease, initially resulting in possible inflammation of the liver, and frequently leading to more serious conditions including cirrhosis and liver cancer. In the United States, there are approximately 300,000 new cases of Hepatitis B Virus (HBV), the most prevalent form of Hepatitis, every year. While there is no cure for Hepatitis B, a vaccine does exist that can prevent infection.

HBV is most often transmitted through breaks in the skin or mucous membranes. This usually occurs through needlesticks, human bites, or having infectious material (such as blood or other body fluids) get into existing cuts or abrasions.

The symptoms of HBV infection are very much like a mild “flu”. Initially, there is a sense of fatigue, possible stomach pain, loss of appetite, and even nausea. As the disease continues to develop, jaundice (a distinct yellowing of the skin) and a darkened urine will often occur. However, people who are infected with HBV will often show no symptoms for some time.

After exposure, it can take 2 - 6 months for Hepatitis B to develop. This is extremely important, since vaccinations begun immediately after exposure to the virus can often prevent infection.

After completing the series of three immunizations, the Hepatitis B vaccine provides protection by building up a sufficient level of antibodies. The vaccine is specific to Hepatitis B and is not effective against other types of hepatitis nor does it protect against the HIV or AIDS virus.

If you feel that your work activities place you at risk for Hepatitis B, please consider the following before taking the vaccine.

**You Should Not Take The Vaccine…**

1. If you have an allergy to yeast.
2. If you are pregnant or nursing.
3. If you are planning to become pregnant within the next six months.
4. If you have had a fever, gastric symptoms, respiratory symptoms, or other signs of illness in the last 48 hours.

You may want to consult your own physician before taking the vaccine.
STANLY COMMUNITY COLLEGE
STUDENT RELEASE FORM
OFFICIAL HEPATITIS B IMMUNIZATION FORM

Part A:

I, ________, in compliance with OSHA guidelines agree to receive the Hepatitis B vaccine series. I have read the Important Information About Hepatitis B and Hepatitis B Vaccine sheet and understand I am at risk of contracting Hepatitis B due to my student related activities. I have participated in a formal education program provided by the College. I have been given the opportunity to ask questions and understand the risk factors involved. I thereby release Stanly Community College from responsibility for consequences of receiving the vaccine.

Signature                                Date

Simulation Guidelines

In order to preserve the function and quality of the equipment and enable future students to benefit from the simulation exercises at Stanly Community College, all participants of simulation agree to abide by the following guidelines:

- Manikins are to be treated as if they are real, live patients.
- Positive, professional communication with faculty instructors, students and other users shall be maintained.
- Faculty, staff and students must complete orientation prior to using the equipment.
- Doors of the simulation hospital will be locked at all times.
- Instructors and students must sign-in and out on the attendance roster.
- Instructors should remain with students while participating in simulation.
- No food or drink is permitted.
- Personal belongings should be minimal into simulated patient care areas.
- No cell phones should be operational around manikins.
- Do not sit on the beds; this is considered the patient’s personal space.
- No ink pens should be used within close proximity of the manikins.
- Manikins should not be removed from their beds.
- Students should not change parts on manikins.
- Students should not perform any procedures on manikins without the instructor’s approval.
- Injections and IV sticks are prohibited on the manikins.
- No betadine, acetone, iodine or other staining fluids should be used on the skin of the manikins.
- All equipment will be returned to proper stations after use.
- All beds should be made neatly and returned to their lowest position.
- Do not use simulated equipment other than its intended use.
- Report any damages to the proper individuals.

Anyone abusing simulated equipment will be asked to leave and may be held responsible for broken or missing equipment.

Appendix viii.

**SCC Simulation Professional Integrity Agreement**

Stanly Community College follows best practice guidelines set forth by the International Association for Clinical Simulation and Learning (INACSL) Standards of Best Practice: Simulation (SM). The standard of Professional Integrity states, “Professional integrity is demonstrated and upheld by all involved in simulation-based experiences” (INACSL, 2016). The criteria necessary to meet this standard include:

1. Foster and role model attributes of professional integrity at all times.
2. Follow standards of practice, guidelines, principles, and ethics of one's profession.
3. Create and maintain a safe learning environment.
4. Require confidentiality of the performances and scenario content based on institution policy and procedures.

Below is the professional integrity agreement and rules of simulation that must be followed in accordance with INACSL Standards of Best Practice: Simulation

**Professional Integrity Agreement**

Simulation activities at SCC include clinical scenarios, simulated task training, simulated patient scenarios, debriefings, and discussions. As a student involved in simulation as a clinical learning experience, you are expected to engage and fully participate as a professional and treat each case as a realistic patient scenario. Therefore, the Health Insurance Portability and Accountability Act (HIPAA) requirements apply with regard to confidentiality of the scenarios. HIPAA regulations apply to all clinical experiences including electronic, written, verbal, or observed, and may not be discussed outside the simulation environment. Any violation to this agreement including sharing, posting to social media, discussion, recording, reproducing or revealing any part of the simulation activity will result in an “unsatisfactory” in clinical performance, which will result in unsatisfactory on the end-of-semester clinical summary, leading to failure to progress in the program.

Your signature below acknowledges that you have read, consent to, and fully understand the implications of this agreement, the guidelines for use of the lab (on the back of this sheet), and will follow each during all simulation activities.
